installing a split air conditioner system

the wall mount

measure the distance between the holes of the wall

use a five millimeter masonry drill with a bosch hammer

prepare to drill the 65 millimeter hole in the wall

use a long masonry drill to pre-drill

start making the hole little by little

making sure the inner and outer holes are matching

connect all cables and wires to the indoor units

lay all the cables out

connecting the coolant lines to the inside unit

tighten the connections with the adapter and the torque

secure the insulation

hang the unit on the wall bracket plate

use some insulating foam

attached properly onto the wall the first 90 degree elbow

push the pipes over the bundle one after the other

cut a hole in the pipe

mark the holes for the bracket

put the outer unit on the bracket

run a separate wire from the house fuse box

close the wire terminal and the wall cord cover

hold the entire connector on the unit with a wrench

press onto the valve with a little piece of wire

turn the valve open

turn on the power with the separate fuse
