## How to Develop and Write a Research Paper

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell's Essays* series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — *Irish Times*

### Handy Guide to Writing Research Papers

Academic writing is the term used for scientific papers written to show an objective stance, organized in such a way that they can easily be replicated by others. And, although many assume that an academic paper must take the form of a thesis, this isn't always true. Academic documents include a wider broad of papers, such as the Book Report, Conference Paper, Dissertation, Essay, Research Article, Research Paper and Technical Report. Another element to academic writing that few know about is that, in any given topic and under any methodology, the author or authors, must assume a starting point, a perspective exposed under the form of a hypothesis. Ultimately, any paper starts with a subjective approach, an assumption, that is then tested and verified, proved or disproved. Furthermore, a research paper is always based on documented data reviewed about a certain topic, in order to justify itself as a new step towards a better understanding, and not merely a repetition of previous discoveries. This new step, however, doesn't need to be intended forward, and can merely refer to a new perspective about something previously studied or known. For the purpose of presenting a qualifiable research with adequate and sophisticated results, students and researchers must conduct an investigation under certain rules and formalized within a specific methodology. It is this methodology that will then allow the necessary acquisition of skills through trial and error, while providing a fruitful ground to learn from mistakes shown along the way, and then correct any necessary procedure being conducted. Taking into account the experience of the author as a college lecturer on the field of academic writing and research in China, but also as a researcher and consultant for many companies from different countries, namely, in Europe, China and the USA, always predicting the outcome verified, this book was prepared to help others in similar fields of work. The intention here is to allow an easy and practical attitude to investigation, one that anyone can easily understand, follow and apply on his own. More than helping college students in creating a better thesis, this book can help anyone in the field of investigation, in

knowing which steps to follow to create strong, valid and interesting arguments on any subject, and that can then be applied to reach valuable outcomes, on a personal or social level. Here, you'll find guidelines related to how one can think and research more effectively.

## How to Prepare an Academic Write-Up

High school students, two-year college students, and university students all need to know how to write a well-reasoned, coherent research paper—and for decades Kate Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. In the new fourth edition of Turabian's popular guide, the team behind Chicago's widely respected *The Craft of Research* has reconceived and renewed this classic for today's generation. Designed for less advanced writers than Turabian's *Manual of Writers of Research Papers, Theses, and Dissertations, Seventh Edition*, Gregory G. Colomb and Joseph M. Williams here introduce students to the art of defining a topic, doing high-quality research with limited resources, and writing an engaging and solid college paper. The *Student's Guide* is organized into three sections that lead students through the process of developing and revising a paper. Part 1, "Writing Your Paper," guides students through the research process with discussions of choosing and developing a topic, validating sources, planning arguments, writing drafts, avoiding plagiarism, and presenting evidence in tables and figures. Part 2, "Citing Sources," begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work—Chicago, MLA, and APA—all with full coverage of electronic source citation. Part 3, "Style," covers all matters of style important to writers of college papers, from punctuation to spelling to presenting titles, names, and numbers. With the authority and clarity long associated with the name Turabian, the fourth edition of *Student's Guide to Writing College Papers* is both a solid introduction to the research process and a convenient handbook to the best practices of writing college papers. Classroom tested and filled with relevant examples and tips, this is a reference that students, and their teachers, will turn to again and again.
