Moody's OTC Unlisted Manual

This manual provides direction for the preparation of noise and vibration sections of environmental documents for mass transportation projects. The manual has been developed in the interest of promoting quality and uniformity in assessments. It is expected to be used by people associated with or affected by the urban transit industry, including Federal Transit Administration (FTA) staff, grant applicants, consultants and the general public. Each of these groups has an interest in noise/vibration assessment, but not all have the need for all the details of the process. Consequently, this manual has been prepared to serve readers with varying levels of technical background and interests. It sets forth the basic concepts, methods and procedures for documenting the extent and severity of noise impacts from transit projects.

Railway Signaling

Railway Signaling and Communications

The Fair Housing Act Design Manual: A Manual to Assist Designers and Builders in Meeting the Accessibility Requirements of The Fair Housing Act provides clear and helpful guidance about ways to design and construct housing which complies with the Fair Housing Act. The manual provides direct information about the accessibility requirements of the Act, which must be incorporated into the design, and construction of multifamily housing covered by the Act. It carries out two statutory responsibilities: (1) to provide clear statement of HUD's interpretation of the accessibility requirements of the Act so that readers may know what actions on their part will provide them with a "safe harbor"; and (2) to provide guidance in the form of recommendations which, although not binding meet the Department's obligation to provide technical assistance on alternative accessibility approaches which will comply with the Act, but may exceed its minimal requirements. The latter information allows housing providers to choose among alternative and also provides persons with disabilities with information on accessible design approaches. The Manual clarifies what are requirements under the Act and what are HUD's technical assistance recommendations. The portions describing the requirements are clearly differentiated from the technical assistance recommendations.

Mergent International Manual

Vols. for 1955-62 include: Mining guidebook and buying directory.

Mergent Bank & Finance Manual

Presents the latest electrical regulation code that is applicable for electrical wiring and equipment installation for all buildings, covering emergency situations, owner liability, and procedures for ensuring public and workplace safety.
