The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Yvain

My Neighbour's Shoes; Or, Feeling for Others. A Tale

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin

of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Worse, Alice, the object of Rin's affections, has become unconsciously attuned to

her own past life. Although Rin claims to be the reincarnation of the mild-mannered doctor Shukaido, Alice suspects the truth, forcing Rin to cruelly drive her away. Now the pressure has come to a head. Rin must take drastic measures as his world is torn apart. -- VIZ Media

When she learns of the opportunity to join the research team

on the KK moon base, she eagerly applies for the position, over the protest of the Lim Lians. Her wish to join good-looking men on the team is fulfilled when she meets handsome Gyokuran and Shion--but will either one quench her desires? -- VIZ Media

In 1999, Andrew Smith was interviewing Charlie Duke, astronaut and moon walker, for the Sunday Times. During the course of the interview, which took place at Duke's Texan home, the telephone rang

and Charlie left the room to answer it. When he returned, some twenty minutes later, he seemed visibly upset. It seemed that he'd just heard that, the previous day, one of his fellow moon walkers, the astronaut Pete Conrad, had died. The more Charlie spoke the more Andrew realised that his grief was something more than the mere fact of losing a friend. 'Now theres only nine of us,' he said. Only nine. Which meant that, one day not long from now, there would be none, and when that day came, no one on earth would have known the giddy thrill of gazing back at us from the surface of the moon. The thought shocked Andrew, and still does. Moondust is his attempt to understand why. The Apollo moon programme has been called the last optimistic act of the 20th Century. Over a strange three year period between 1969 and 1972, twelve men made the longest and most eccentric of all journeys, and all were indelibly marked by it. In Moondust Andrew sets out to interview all the remaining astronauts who walked on the moon, and to find out how their lives were changed for ever by what had happened. 'Where do you go after you've been to the moon?' In addition to this question that would prove hugely troubling to many of the returned astronauts, they also had to deal with the fantasies of faceless millions at their backs, for this was the first truly global media event. The walkers would forever be caught between the gravitational pull of the moon and the earth's collective dreaming.

Stories of the first moon landing as experienced by real people from around the world—great for fans of A Man on the Moon, Rocket Men, or First Man. Astronauts Neil Armstrong and Edwin “Buzz” Aldrin left humanity’s first footprints on the Moon, July 20, 1969. The plaque they left behind reads, “Here men from the planet Earth first set foot upon the Moon, July 1969, A.D. We came in peace for all mankind.” But was the Apollo 11 moon landing mission really a global endeavor? How did people outside the United States view these “rocket men?” Against the political backdrop of the Cold War between the United States and the Soviet Union, was it, indeed, “For all mankind?” Dr. Tanya Harrison and Dr. Danny Bednar have talked to individuals from a variety of locations outside the United States, to see how this event touched the lives of people across the world. Enthusiasts of space travel, the Apollo missions, and the moon landings will love this book. These previously untold stories reveal the impact of the moon landings around the globe, and what having a “man on the moon” meant to the international community. In this exciting book, readers will: · Find interviews with eight non-Americans to get their perspectives · Be inspired by their memories of the event · Learn more about one of the most historic events in human history “An absolute delight! By telling the story of the 1969 Apollo 11 moon landing through the eyes of observers from around the world, [Harrison and Bednar] bring freshness to it that is utterly beguiling.”—Dr. Andrew Maynard, author of Films from the Future and Future Rising

Nick Kalvane is being watched by a shadowy, black ops group, who have an interest in abilities that Nick is blissfully unaware he possesses. While on a solo trip to the governmentally denied Groom Lake facility in the Nevada desert, Nick is abducted, and comes to in a strange room. There he is visited by the man who abducted him, Bill McGraw, who indoctrinates Nick that an extraterrestrial race from a planet that comes into close orbit with Earth every thirty six hundred years combined their own DNA with primitive man to create a race of slaves known as human beings. A civil war on that planet halted the program but Nibiru is set for another near Earth encounter and they aim to pick up where they left off.

Thoughtful Thoughts

They used to joke about it. Like many brilliant scientists, Josh sometimes had trouble remembering things that needed doing in the “real” world—like buying groceries, eating regular meals, and talking to people. But he was happy to have his beloved wife, Lauren, remind him with her “honey do” lists. He just never realized how much he would need one when she was gone. Being a widower is not something Joshua Park ever expected. Given his solitary job, small circle of friends and family, and the social awkwardness he’s always suffered from, Josh has no idea how to negotiate this new, unwanted phase of life. But Lauren had a plan to keep him moving forward. A plan hidden in the letters she leaves him, giving him a task for every month in the year after her death. A plan that leads Joshua with a loving hand on a journey through grief, anger, and denial. It’s a journey that will take Joshua from his first outing as a widower to buy groceries...to an attempt at a dinner party where his lack of experience hosting creates a comic disaster...to finding a new best friend while weeping in the dressing room of a clothing store. As his grief makes room for new friendships and experiences, Joshua learns Lauren’s most valuable lesson: The path to happiness doesn’t follow a straight line. Funny, sometimes heart-wrenching, and always uplifting, this novel from New York Times bestselling author Kristan Higgins illuminates how life’s greatest joys are often hiding in plain sight.

Pack Up the Moon

Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series from Steven Erikson. The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen’s rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, Gardens of the Moon is epic fantasy of the highest order--an enthralling adventure by an outstanding new voice. My Body, My Earth provides the tools to explore your somatic warehouse of generational memory in order to decipher the cause and effect of your experiences and life patterns. When your personal stories go unremembered they become dormant, and typically translate into a symptom-which is your body talking to you, saying, "Wake up, pay attention, don't forget about this " Historical amnesia locks these stories in the body, manifesting as pain, disease, addictions, emotional patterns, and repetitive circumstances. Somatically excavating your personal legend unearths memories of the past that can be reconciled and healed in order to create a new myth-for your body and for your Earth. When we experience a symptom as painful, we are taught to suppress or ignore it. Doing this for long periods of time aggravates the symptom, establishing chronic, generational physical or emotional conditions. Expressing or tending to symptom through the process of somatic remembering, helps to relieve pain and creates spiritual well-being, emotional optimism, and physical freedom. This guidebook for personal transformation reveals the Five Steps of Somatic Archaeology so that you, too, can heal your past and recover your joy. Somatic Archaeology(TM) bridges the ancient Medicine Wheel, human behavior, spirituality, and bodywork into a revolutionary pathway that provides tools for body evolution-a natural

and gradual progression of recreating ourselves and our world while in this physical form. I invite you to remember.

Ryland Grace is the sole survivor on a desperate, last-chance mission—and if he fails, humanity and the earth itself will perish. Except that right now, he doesn’t know that. He can’t even remember his own name, let alone the nature of his assignment or how to complete it. All he knows is that he’s been asleep for a very, very long time. And he’s just been awakened to find himself millions of miles from home, with nothing but two corpses for company. His crewmates dead, his memories fuzzily returning, Ryland realizes that an impossible task now confronts him. Hurtling through space on this tiny ship, it’s up to him to puzzle out an impossible scientific mystery—and conquer an extinction-level threat to our species. And with the clock ticking down and the nearest human being light-years away, he’s got to do it all alone. Or does he? An irresistible interstellar adventure as only Andy Weir could deliver, *Project Hail Mary* is a tale of discovery, speculation, and survival to rival *The Martian*—while taking us to places it never dreamed of going.

Leave the World Behind

Jason Thompson, Level 14 Shaman/Oozemaster and author of *Manga: The Complete Guide*, joins forces with Victor Hao to deliver a wickedly funny send-up of manga and gamer culture. Roll up your character and get ready! **THE GREATEST GAMER ON EARTH** At the University of California, Escondido, no one would guess that freshman Shesh Maccabee is a hard-core gamer—and in recovery to boot, following a court order, a wireless ban, and months of therapy (all because of one little seven-day Internet café episode). His friend Mike—who personally prefers Japanese-console RPGs—is tasked with keeping Shesh far away from any computer with access to *World of Warfare*. Everything's going according to plan—until a Ren Faire fangirl introduces them to the campus gaming club, where they meet Theodore, a fanatical tabletop game master whose single goal in life is to run the greatest *Mages & Monsters* game in the world. And there just happens to be room for two more players. Soon Shesh and Mike are dragged into the dungeon of hard-core gaming—and cops, baboon

men, Sri Lankan cave roaches, and Gothémon card collectors converge in the zaniest adventure that ever involved twenty-sided dice!

The Book of Night with Moon

As the dust settles on the 30th anniversary of Apollo 11, information is now coming to light that throws into serious doubt the authenticity of the Apollo record. New evidence clearly suggests that NASA hoaxed the photographs taken on the surface of the Moon. These disturbing findings are supported by detailed analysis of the Apollo images by professional photographer David S Percy ARPS and physicist David Groves PhD. The numerous inconsistencies clearly visible in the Apollo photographic account are quite irrefutable. Recent research indicates that the errors evidenced in DARK MOON were deliberately planted by individuals determined to leave clues to the faking in which they were unwillingly involved. DARK MOON is the answer to the question-did the Apollo missions really land a man on the Moon and return him alive and well to Earth, or is the record incorrect?

Project Hail Mary

The moon was bored, bored of going round and round the Earth day and night. He yearned for more, so one day he asked the universe for help. Join the moon on his journey through the solar system as he finds out just how important he really is.
