Every Theorem on Circle with Proofs.| Theorem on Circles.| Class 9 |NCERT. - Every Theorem on Circle with Proofs.| Theorem on Circles.| Class 9 |NCERT. by PHYMICS 157,593 views 4 months ago 8 minutes, 20 seconds - In this video I have explained 8 most important theorems on circles and their proofs with proper visualization. I will be bringing ...

Intro

Equal chords subtend equal angles at the center.

If the angles subtended by two chords at the center are equal then the length of the chords are also equal.

Any line perpendicular from center to the chord bisects the chord.

Equal chords of a circle are equidistant from the center.

The angle subtended by the arc at the center is double the angle subtended by the arc at any point on the remaining part of the circle.

Angle formed in a semi circle is 90 degrees.

Only 1 unique circle can pass through three non-collinear points.

Angles formed in the same segment of a circle are equal.
