The History of Financial Planning

The first book to provide a comprehensive history of the financial planning profession The financial services field has been revolutionized in the last quarter of the twentieth century by the financial planning profession. So much has happened in so little time that it has been difficult to keep up with the events and key players that make up the world of financial planning. The History of Financial Planning is the first book to provide a comprehensive history of the profession. Backed by the Financial Planning Association, The History of Financial Planning offers a clear overview of the industry and how it has grown and changed over the years. This book chronicles the history of the profession, with explanations of how the financial planning movement has grown beyond the United States to other countries-particularly in the last fifteen years. The book also demonstrates how the work of key researchers, such as Dr. Daniel Kahneman, Vernon Smith, and Amos Tversky, has influenced the rise of the financial planning profession Names "four initial engines of growth" that contributed to the success of financial planning Reveals the moments and key players that define the history of financial planning Discusses the emergence of the Financial Planning Association (FPA) The financial planning field has a rich history, and with this book as your guide, you'll quickly discover how it has evolved over the years.

FINANCIAL PLANNING IN AUSTRALIA

Financial Planning has been thoroughly revised to reflect the legislative and regulatory changes that affect the Australian financial planning industry. This new edition considers a number of reforms introduced as a consequence of the global financial crisis and the Henry Review on taxation reform. The text continues to present a comprehensive introduction to financial planning decisions, services and products, risk management and the importance of long term strategic financial planning and life-long management. The text is the new edition of what was previously titled Personal Finance which has been a market leading textbook in the area of financial planning for 10 years. As more and more Australians look to financial planners for information and guidance on investment opportunities, and short-term and long-term financial planning goals, this new edition reflects the financial planning industry need to ensure that its members are accredited and comply with industry recognised professional and ethical skills.

FINANCIAL PLANNING IN AUSTRALIA

"Financial services' is the fastest growing sector of the economy and has profound implications for individuals, corporations and government. Following extensive review in the last part of the twentieth century, Australia has now put in place an overarching system for regulating all financial services, replacing a system based on separate regulation of products in individual industries. Financial Services Law and Compliance in Australia provides a comprehensive account of the new regulatory structure and a detailed analysis of the new legislative framework, including discussion of the new regulatory bodies, the new licensing requirements for those wishing to enter the financial services market and the new obligations for those marketing or offering financial services to the public. This book is an essential resource for those working in, and advising on, financial services, students and those needing to understand the new regime as a whole."--Provided by publisher.

This book investigates the legitimacy of the current Australian Financial Services Licensee-Authorised Representative (AFSL-AR) licensing model, as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency, legislation, legitimacy and the independent individual regulatory regimes in other professions; thereafter integrating this framework with the financial planning theory to examine the legitimacy, or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licensing model in Australia.

Modern Financial and Investment Planning

A man is not a financial plan. So says investor and entrepreneur Kim Kiyosaki. Australian financial adviser Helen Baker couldn't agree more. In *On Your Own Two Feet: Steps Towards Financial Independence*, Helen Baker blends the financial wisdom gained in her years as an accredited financial adviser with emotional awareness of how ages, stages and experiences in women's lives influence money matters and that all present unique challenges for which there is no 'one size fits all' solution. Helen's goal is for women to be the best they can, including financially. That, she knows, comes with control and certainty. Both require knowledge. Within these pages, she reveals: - five financial fundamentals no woman can get away without - how doing smart things early over a long time minimises risk while growing wealth - the 10 biggest mistakes women make in divorce settlements - survival tips for redundancy-or when two becomes three in a household - understanding aged care - how to handle an inheritance - or set one up so that your wishes truly are seen through - and much, much more. *On Your Own Two Feet* is for Australian women of all ages: mothers, sisters, grandmothers, daughters and girlfriends. No woman's financial literacy is complete without the sensible tips and case studies presented in this easy-to-read format.

Occupational licensure, including regulation of the professions, dates back to the medieval period. While the guilds that performed this regulatory function have long since vanished, professional regu-

lation continues to this day. For instance, in the United States, 22 per cent of American workers must hold licenses simply to do their jobs. While long-established professions have more settled regulatory paradigms, the case studies in *Paradoxes of Professional Regulation* explore other professions, taking note of incompetent services and the serious risks they pose to the physical, mental, or emotional health, financial well-being, or legal status of uninformed consumers. Michael J. Trebilcock examines five case studies of the regulation of diverse professions, including alternative medicine, mental health care provision, financial planning, immigration consulting, and legal services. Noting the widely divergent approaches to the regulation of the same professions across different jurisdictions – paradoxes of professional regulation – the book is an attempt to develop a set of regulatory principles for the future. In its comparative approach, *Paradoxes of Professional Regulation* gets at the heart of the tensions influencing the regulatory landscape, and works toward practical lessons for bringing greater coherence to the way in which professions are regulated.
