How Chinese Teach Mathematics and Improve Teaching builds upon existing studies to examine mathematics classroom instruction in China. It combines contributions from Chinese scholars with commentary from key Western scholars to offer a truly systematic examination of some important and distinctive features of mathematics classroom instruction. Viewing classroom instruction as part of teachers' instructional practices, this book goes beyond teachers' in-classroom instructional practice by also examining Chinese teachers' approaches and practices in developing and improving teaching. Through this unique approach, How Chinese Teach Mathematics and Improve Teaching expands and unpacks the otherwise fragmented knowledge about Chinese practices in developing and carrying out mathematics classroom instruction.

Marlow had heard about The 'Company' running a Colonial enterprise in the Belgian Congo. Marlow soon got appointed as the Captain of a river steamer & he sets out for Africa

Marlow witnesses the evil of imperialism in Africa He encounters inefficiency & brutality in the Company's stations. The native people of Africa have been forced into the Company's service. They suffer from overwork and ill-treatment

Marlow arrives at the central station run by the general manager. He hears of a man named Kurtz, a colonial agent who is unmatched in his ability to procure ivory from the continent's interior
