solve a system of linear equations using the substitution method

using substitution

subtract off a 2x from both sides

clean it up and simplify

add 44 to both sides

divide both sides by 15

use either of the original equations

put them together into an xy pair for your answer

solving with substitution

solve for x or y in one of the equations

add 2y to both sides

divide both sides by 3

plug it in for x in the first equation

using the distributive property

deal with the fractions

the answer is infinitely many solutions

subtract y from both sides
