Judging a book by its cover

Woke politics and recent developments in AI

Making your mind into a friend

Meditation and the nature of self

The analogy of the optic blind spot to explain the concept of the absence of a self. He describes how, through a simple experiment, one can confirm the existence of the optic blind spot by moving a dot on a piece of paper in and out of sight. Harris draws a parallel between this experience and the search for the self, suggesting that both require a deliberate and precise way of looking. He emphasizes that the sense of self is the anchor for most psychological suffering and that letting go of this sense of self leads to profound relief. Harris also mentions the importance of meditation in gaining perspective on the inner dialogue that often causes suffering. Additionally, we touch on the heightened sensitivity to grayscale intensity in the region of the optic blind spot, intriguing as an astronomer.

Slipping into psychopathy

Who Sam relies on for external advice

On Trump's narcissism

Musk's ambition to colonize Mars

Sam Harris shifts the conversation from religion to space exploration and the human obsession with leaving a legacy. He expresses his skepticism about the coherence of the idea of colonizing Mars as a backup plan for humanity, given our evolutionary success on Earth and the uncertainty of our ability to build a perfect city on the red planet. Harris also shares his perspective on human happiness and being a good person, emphasizing the importance of turning one's attention away from oneself and focusing on helping others. He criticizes the narcissistic nature of the Mars fantasy and the desire for a grand legacy, comparing it to vanity and other negative emotions. Harris also questions Elon Musk's belief in Stoicism, suggesting that Musk's Mars mission might not align with the stoic precept of accepting the inevitability of death.

Does Sam miss academia?

Research on the brain's response to beliefs, focusing on the distinction between belief, disbelief, uncertainty and disgust. Harris emphasizes that higher cognitive functions, including belief and judgment, are built on lower structures and processes that evolved for other purposes. He shares his personal preference for thinking, writing, and speaking about the mind rather than conducting neuroimaging experiments himself. Harris also expresses his dream of using advanced neuroimaging technology to verify the truthfulness of podcast guests' statements.

Gene Pools + Allele Frequency

Hardy-Weinberg Principle

Used to calculate frequency of genotypes, phenotypes and alleles

In corn, purple kernels are dominant to yellow. A random sample of 100 kernels is taken from a population in Hardy-Weinberg equilibrium. It is found that 9 kernels are yellow and 91 kernels are purple. What is the frequency of the yellow allele in this population?

A population of sheep is in Hardy-Weinberg equilibrium. The allele for white wool (W) has an allele frequency of 0.19, and the allele for black wool (w) has an allele frequency of 0.81. What is the percentage of heterozygous individuals in the population?
