### Soviet Strategies in Southeast Asia

This study's main concern is with the growth of Communism within Burma, Thailand, Malaya, Indonesia, Indochina, and the Philippines. The author explores the origin and fate of these indigenous movements, their role in domestic politics and relationship to the metropolitan parties (in the case of colonial dependencies) and to the Soviet Union, and their success or failure under the conditions of independence. He also assesses the influence of Communist experience in China, the formation of Russian policy in Southeast Asia, and the policies of the domestic Communist parties. Originally published in 1966. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

### Soviet Strategies in Southeast Asia

This book, the final report of the Soviet Global Strategy Project, describes the USSR's basic approach to the many states in Asia and the Pacific Basin, including nations stretching from Japan to Australia.

### Soviet strategies in Southeast Asia

This book focuses on the activity of the Soviet Union in Southeast Asia and the effects of Soviet policy on the region from 1969 to the time of first publication in 1986. In particular, Leszek Buszynski examines the rivalry between the Soviet Union and China, Soviet presence in Vietnam, and the responsive efforts of surrounding regions towards collective security. U.S. policy in the region is a key consideration,

particularly in terms of American attempts to placate China and encourage Japan to assist in the defence of the region. With a concluding assessment of regional trends and possible outcomes, this is an important and valuable work for students and scholars with an interest in the history and politics of international diplomacy in Southeast Asia.

### The Soviet Union in Southeast Asia

This memorandum considers whether Soviet foreign policy in the ASEAN countries has been a success or failure. The author contends that after Vietnam invaded Kampuchea with Soviet support--and the ASEAN area assumed greater importance to Moscow than ever before--whatever influence the USSR had in ASEAN capitals was negated. ASEAN countries forcefully have opposed Vietnamese and Soviet policy toward Kampuchea and the refugee problem, and indirectly have supported China. The author believes that Soviet strategy to contain China requires at least ASEAN neutrality, and that Soviet moves to reverse current trends can be expected. (Author).

### Asia In Soviet Global Strategy

Gorbachev's major speech at Vladivostok on 28 July 1986 signalled an increased awareness by the Soviet Union of the importance of the Asia-Pacific region. Subsequently there have been significant changes in Soviet foreign policy, paralleling the programme of wide-ranging internal reform and imparting a new look to the USSR's international image. The aim of the present work is to chart the development of Soviet policy towards the region since the start of the Bolshevik regime, with whether there was any pattern or consistency in that policy. Concentration on Soviet activity in a particular part of the world might also serve to throw further light on the much discussed question whether Moscow's policies have in the past been conceived in ideological terms (and therefore in some measure pre-determined) or whether they were truly ad hoc, ideology being used merely as justification.

### Soviet Foreign Policy and Southeast Asia (Routledge Revivals)

With the rise of India and China, the rest of Asia is feeling the great impact of socio-economic changes. However, Russia's interaction with ASEAN is limited to dialogue between both parties. This book sets out to help explain these anomalies and puzzles, by examining the state of relations between Russia and selected individual ASEAN countries.

### The Soviet Union and ASEAN

In this work, experts in the Soviet, American and Asian military forces have contributed individual papers dealing with the political and economic effects that the Soviet and American military presence has initiated in Southeast Asia. Topics include military strategy, presence and security.

### Soviet Relations With South East

First published in 1992, this book examines Soviet foreign policy towards Southeast Asia in the context of the transformation of the perestroika era in the Soviet Union. The discussion begins in 1985 and ends in 1989 with the Soviet partial withdrawal from Cam Ranh Bay. Buszynski considers Gorbachev's effort to disengage from the Cambodian problem, the weakening of the Soviet alliance with Vietnam and the real effort to overcome old hostilities with growth areas in ASEAN such as Thailand and Singapore. This is a fascinating and relevant title, of particular value to students with an interest in Russia and the history of international relations in Southeast Asia.

### ASEAN-Russia Relations

From the end of World War II down to the dissolution of the Soviet Union, the primary objective of U.S. foreign policy has been to prevent the expansion of communism. Indeed, that objective was directly embodied in the so-called strategy of containment, a global approach to the pursuit of U.S. national security interests that was first adumbrated by George F. Kennan in 1947 and later became the guiding force in U.S. foreign policy. At first, the concept of containment was applied primarily to Europe. It was there that the threat to U.S. interests from international communism directed from Moscow was first perceived, in the form of Soviet efforts to dominate the nations of Eastern Europe and extend Soviet influence into the eastern Mediterranean and the Middle East. Other areas of the world—Asia, Africa, and Latin America—were considered to be less threatened by forces hostile to the free world or more peripheral to U.S. foreign policy concerns. At least that was the view initially proclaimed by George

Kennan himself, who identified five areas in the world as vital to the United States: North America, Great Britain, Central Europe, the USSR, and Japan. Only the latter was located in Asia. By the end of the decade, however, the focus of U.S. containment strategy was extended to include East and Southeast Asia, primarily because of the increasing likelihood of a communist victory in the Chinese Civil War, which, in the minds of some U.S. policymakers, would be tantamount to giving the Soviet Union a dominant position on the Asian mainland. Added to the growing threat in China was the increasingly unstable situation in Southeast Asia, where the long arc of colonies that had been established by the imperialist powers during the last half of the nineteenth century was gradually but inexorably being replaced by independent states. The emergence of such colonial territories into independence was generally viewed as a welcome prospect by foreign policy observers in Washington, but when combined with the impending victory of communist forces in China it raised the unsettling possibility that the entire region might be brought within the reach of the Kremlin.

### Soviet Asian Strategy in the Brezhnev Era and Beyond

This study attempts to analyse 20 years of Soviet-ASEAN relations -- what it is; how it has developed; why it has taken the stated course. It begins with an examination of Soviet attitude towards Southeast Asian regionalism and its policies towards ASEAN. Key issues in Soviet-ASEAN relations are next explored, followed by analyses of Soviet relations with individual member states and how each of these in turn perceives the Soviet Union. The changes initiated by Gorbachev and how these have affected Soviet-ASEAN relations are then highlighted and finally, the future prospects of Soviet-ASEAN relations are evaluated.

### Military Basing and the U.S./Soviet Military Balance in Southeast Asia

In examining the economic and social reforms of Gorbachev's Soviet Union, the contributors to this new study provide a broad portrait of the state of current soviet relations with the countries of the Asia-Pacific region, the prospects for change, and the perceived role of the Soviet Union in that change. Leading established scholars and specialists from the countries of the Asia-Pacific region study this new Soviet phenomenon and evince a mixture of enthusiasm and apprehension about Moscow's new policy overtures to the region. Mikhail Gorbachev's speech in the Soviet Far East city of Vladivostok on July 28, 1986, was widely read and commented upon throughout East and Southeast Asia, and raised many unanswered questions: How much has the Soviet Union really changed? Will China, the principal target of Soviet overtures, respond positively and, if so, what will the implications be for the rest of the region? What do these sweeping changes mean for the region in practical terms? The Soviet Union and the Asia-Pacific Region considers these questions and offers insight and provocative commentary on the current attitudes of the many Asia-Pacific countries toward the Soviet Union.

### The Strategic Triangle

This study investigates the overall Soviet conception of non-alignment in the Third World and assesses Soviet policy in relation to this issue.

### Bear Tracks in Indochina

Since the end of the war in Vietnam and the withdrawal of the American presence there, a marked realignment of power has taken place in Southeast Asia. The old rivalry between China and the United States has become a relationship of cautious rapprochement, while Sino-Soviet competition has been intensified by China's fear that the USSR will move to fill the power vacuum created by the U.S. departure. The United States no longer perceives a friendly Sino-Southeast Asian relationship to be as much of a danger to its security interests as it once did, but how that relationship develops remains of considerable importance to this country. In this book, Edwin Martin examines some of the principal factors in China's current relations with the Southeast Asian countries— China's domestic policies, Peking-oriented insurgency in Southeast Asian countries, the Overseas Chinese, trade considerations, the policies of third powers—and concludes that the newly emergent nationalism in Southeast Asia, coupled with Sino-Soviet rivalry, indeed diminishes the threat posed by a Communist Indochina and calls for a U.S. policy of encouraging stable relations in the area, both among the countries themselves and between them and the PRC. He asserts that a four-way balance of power— involving the United States, the USSR, the PRC, and Japan—will prevent a power vacuum in the area and will allow the Southeast Asian countries to develop their own strengths, both political and economic. It is thus to the advantage of the United States to encourage all steps toward regional cooperation; U.S.

policy, Professor Martin concludes, should neither abandon Southeast Asia, nor attempt to dictate to it.

### Soviet Strategy Towards Australia, New Zealand and Oceania

An evaluation of Soviet efforts to penetrate the major regions in the southern hemisphere, concluding that success has been modest and continues to be costly. It is suggested that a world society could emerge based on socio-economic and political competition rather than conflict and arms races.

### Restructuring of Soviet Far Eastern Air Power

Since its inception as a state, Russia has been both a European and an Asian power. Although Russia today, as was true during much of its history, is torn by an identity crisis over where it belongs, its elites have never renounced Russia's vital interests in Asia and the belief that it should be recognized as a great power there. However, that belief and Moscow's ability to sustain it are now under threat, due, as Dr. Stephen Blank's thorough analysis informs us, to the ongoing failures of Russian policymakers to come to grips with changed Russian and Asian realities. At the same time, this aspect of Russian policy has been neglected in American assessments of Russia. This is a serious shortcoming, because, in Dr. Blank's view, Russia's Asian policies, viewed in their full breadth, are important signs of present and future trends concerning its behavior at home and in the wider world. Those policies are also significant as Asia's importance in world affairs rises. We ignore the threatening situation facing Russia, and Moscow's failure to adjust to those threats, only at our own peril. The growing concern over Russian arms transfers to China, a subject addressed in the study, is only one sign of unexpected negative trends that might work against U.S. interests if we continue to neglect Asian aspects of Russia's global behavior and policy.

### Soviet Naval Capability in Southeast Asia

Contents: Relationship between strategic and theater warfare in Soviet discourse Theater warfare Conventional warfare in a theater context Limited war Question of limiting third-power conflicts in Europe The Cyprus case The problem of national liberation wars Sharpening of criticism from the Chinese camp Soviet limited war attitudes in light of the Southeast Asia situation Limited war and the debate over war as an instrument of policy The question of improving Soviet local war capabilities.

### Soviet Capabilities, Interests and Strategies in East Asia in the 1980s

The historiography of the Cold War has long been dominated by American motivations and concerns, with Southeast Asian perspectives largely confined to the Indochina wars and Indonesia under Sukarno. Southeast Asia's Cold War corrects this situation by examining the international politics of the region from within rather than without. It provides an up-to-date, coherent narrative of the Cold War as it played out in Southeast Asia against a backdrop of superpower rivalry. When viewed through a Southeast Asian lens, the Cold War can be traced back to the interwar years and antagonisms between indigenous communists and their opponents, the colonial governments and their later successors. Burma, Malaysia, Singapore, Brunei, and the Philippines join Vietnam and Indonesia as key regional players with their own agendas, as evidenced by the formation of SEATO and the Bandung conference. The threat of global Communism orchestrated from Moscow, which had such a powerful hold in the West, passed largely unnoticed in Southeast Asia, where ideology took a back seat to regime preservation. China and its evolving attitude toward the region proved far more compelling: the emergence of the communist government there in 1949 helped further the development of communist networks in the Southeast Asian region. Except in Vietnam, the Soviet Union's role was peripheral: managing relationships with the United States and China was what preoccupied Southeast Asia's leaders. The impact of the Sino-Soviet split is visible in the decade-long Cambodian conflict and the Sino-Vietnamese War of 1979. This succinct volume not only demonstrates the complexity of the region, but for the first time provides a narrative that places decolonization and nation-building alongside the usual geopolitical conflicts. It focuses on local actors and marshals a wide range of literature in support of its argument. Most importantly, it tells us how and why the Cold War in Southeast Asia evolved the way it did and offers a deeper understanding of the Southeast Asia we know today.

### Gorbachev and Southeast Asia (Routledge Revivals)

The years 1900 to 1954 marked the transformation from an exotic, colonized "Far East" to a more autonomous, prominent "Asia Pacific". This anthology examines the grand strategies of great powers as they vied for influence and ultimately hegemony in the region. At the turn of the twentieth century, the main contestants included the venerable British Empire and the aspiring Japan and United States. The unwieldy leviathan of China, the European imperial holdings in Southeast Asia, and the expanses of the western Pacific emerged as battlegrounds in literal and geopolitical terms. Other less powerful nations, such as India, Burma, Australia, and French Indochina, also exercised agency in crafting grand strategies to further their interests and in their interactions with those great powers. Among the many factors affecting all nations invested in the Asia Pacific were such traditional elements as economics, military power, and diplomacy, as well as fluid traits like ideology, culture, and personality. The era saw the decline of British and European influence in the Asia Pacific, the rise and fall of Japanese imperialism, the emergence of American primacy, the ongoing struggle for independence in Southeast Asia, and China's resurrection as a contender for hegemony. Great powers shifted and so too did their grand strategies.

#### U. S. Containment Policy and the Conflict in Indochina

The Soviet Union in World Politics, first published in 1980, looks at the change in direction of Soviet foreign policy away from world revolution in the 1970s. Examining the impact of Soviet policies and actions on key nations and regions throughout the world and highlighting their significance as agents for change in the international arena, the authors present an overview of world politics, as well as an in-depth study of Soviet international behaviour.

#### The Soviet Union, Challenges and Responses as Seen from the European Point of View

This monograph provides a timely assessment of the geostrategic significance of Asia-Pacific and offers as a thought-provoking analysis of the U.S. strategic shift toward the region and its implications, with several key points. First, Asia-Pacific, which covers China, Northeast Asia, and Southeast Asia, is a region with complex currents. On the one hand, there is an unabated region-wide drive for economic development that has been pushing Asia-Pacific forward for decades. On the other, this region is troubled with, aside from many other conflicts, unsettled maritime disputes that have the potential to trigger wars between and among Asia-Pacific nations. Second, on top of these mixed currents, China and the United States compete intensely over a wide range of vital interests in this region. For better or for worse, the U.S.-China relationship is becoming a defining factor in the relations among the Asia-Pacific nations. Third, the U.S. strategic shift toward Asia-Pacific is, as President Obama puts it, not a choice but a necessity. Although conflicts elsewhere, especially the ones in the Middle East, continue to draw U.S. attention and consume U.S. foreign policy resources, the United States is turning its focus toward China and Asia-Pacific. Fourth, in the mid-2000s, the United States and China made an unprecedented strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition. Fifth, at this time of U.S. strategic reorientation and military rebalancing toward Asia-Pacific, the most dangerous consideration is that Asia-Pacific nations having disputes with China can misread U.S. strategic intentions and overplay the "U.S. card" to pursue their territorial interests and challenge China. Finally, territorial dispute is becoming an urgent issue in the Asia-Pacific.

#### The Hidden Manna

The Hidden Manna has become a classic on Eucharistic teaching. Now in a second edition, accompanied by a new introduction by Fr. Kenneth Baker, a new preface from the author, new material from John Paul II, and the original foreword by Cardinal John O'Connor, this in-depth study lets the breadth and richness of the Church's Tradition speak for itself. Fr. O'Connor presents and comments on substantial

excerpts from the major sources of the Church's Tradition extending all the way back to apostolic times. Focusing on the doctrine of the Real Presence, he follows the earliest witnesses through the challenge in the Middle Ages of Berengarius through the Protestant Reformation and modern disputes. Father James O'Connor gives us nothing less than a comprehensive study of the Church's meditation on the Mystery of the Eucharist... The Hidden Manna is a superb work. •Cardinal John O'Connor œWe owe a debt of gratitude to Fr. James O'Connor for writing this beautiful treatise on the Sacrament of Sacraments™ The Hidden Manna is a remarkable accomplishment of Catholic scholarship. •Fr. Kenneth Baker, S.J.

### The Eucharist as the Center of Theology

One contemporary critique of Thomistic theology is that it dehistoricizes the relationship between God and creation. This position is a consequence of identifying the prius of theology as God. The Eucharist as the Center of Theology offers an alternative in that it examines a free historical prius, the Eucharist, as proposed by Donald J. Keefe, S.J., and then discusses and develops aspects of St. Thomas Aquinas' thought that support such a prius.

### The Revelation of the Tree of Life: the Theology of Divine Perfection

The aim of ""The Revelation of the Tree of Life: The Theology of Divine Perfection"" is to show Christians and non-Christians a brief presentation of the fuller sense ""sensus plenior"" of God's revelation that began with the Tree of Life in the Garden of Eden and ended in the Triumph of the Cross. The procedure of comparing parallel subjects, the principle of the repetition method, the study of God's perfection, and God's sworn testimonies to man were the methods employed in the composition of this exposition. The Revelation of the Tree of Life takes in the whole work of God's Divine revelation (the Old and New Testaments) and interprets them in context and according to Apostolic tradition. The mystery of the Tree of Life once thought impenetrable to human knowledge will be unveiled. The unveiling of the Tree of Life will reveal God's deeper salvific plan for mankind, which is directly connected with the Institution of the Holy Eucharist. For the Tree of the Cross is the Tree of Life.

### You'll Be Changed Into Me

In recent decades, Catholic books on the Eucharist have often focused narrowly on the question of the nature or essence of the Eucharist. Although the question of the nature of the Eucharist is undoubtedly important, it unfortunately has overshadowed a question that is just as important, if not more important: what does the Eucharist do? If Jesus' body, blood, soul, and divinity are truly present in the Eucharist as Catholics believe, then we should not be surprised to learn that when Catholics receive the Eucharist they receive multiple effects, or fruits. You Will Be Changed Into Me introduces six of the most important fruits of the Eucharist. It will explore how the Jesus Event is brought to the present through Eucharistic memory; it will investigate how the Eucharist is the application of Christ's sacrificial offering on the cross; it will demonstrate how the Eucharist radically conforms the communicant to the heart of Christ; it will review the unity in the human family that is created by the Eucharist through union with Christ; it will show how a Eucharistic life leads to a life of service; it will explain the significance of the Eucharist for the journey beyond this life.

### The Eucharist's Biographer

Christians are not just called to be transformed into something "better" or even "good," but to be transfigured into a "new creation"--ceasing to be what they are in order to become what they are not. In The Eucharist's Biographer, Albert Walsh proposes that the path to this "distinctive Christian identity" is through the power of the Holy Spirit, as revealed in the unity of Word and Sacrament. With this premise, he unites two powerful traditions: the Proclamation of the Word of the Protestant tradition and the Power of God's Grace in the Eucharist of the Roman Catholic and Eastern Orthodox traditions. It is in what Walsh calls the eucharistic-evangel as a whole that the individual and community are subject to the "real presence" of the Christ, who, in the power of the Holy Spirit, is the force behind the transformation and maintenance of Christian identity.

This work surveys and identifies the most important liturgical and theological texts from the biblical, Patristic, medieval, Reformation, and modern periods in order to understand how the Eucharist has shaped, and been shaped by, texts, ritual, and doctrine.

## èÕÐ Üé êÕÙêÕÐÑ

This collection of essays is a tribute to Rachel Elior's decades of teaching, scholarship and mentoring. If a Festschrift reflects the individuality of the honoree, then this volume offers insights into the scope of Rachel Elior's interests and scholarly achievements in the study of the Dead Sea Scrolls, Jewish apocalypticism, magic, and mysticism from the Second Temple period to the later rabbinic and Hekhalot developments. The majority of articles included in the volume deal with Jewish and Christian apocalyptic and mystical texts constituting the core of experiential dimension of these religious traditions.

## The Sacraments

What are the sacraments, really? For centuries, the religious lives of Catholics and other Christians have revolved around church rituals with generally accepted individual and social effects. What, precisely, are those effects, and how are they produced? Traditional theology used Greek philosophy to understand the sacraments and how they work. But is there no other way to understand them? In fact, there are a number of ways, and this book invites you to look at the sacraments through a variety of lenses: psychology, sociology, anthropology, history, theology, morality, and spirituality. As the introduction to this volume challenges, "If you read this book, and especially if you engage in the interactive study to which it invites you, your understanding of sacraments will be changed forever." To help personalize your investigation, the author has created a web site with thought-provoking questions that encourage you to interact with the ideas being proposed in this volume. To engage these topics more deeply, see [www.TheSacraments.org](http://www.TheSacraments.org).

## The Holy Bread of Eternal Life

Recent decades have been marred by pervasive Eucharistic abuse, from violations of liturgical norms and rubrics to practices that encourage irreverence and facilitate habitual sacrilege. The coronavirus crisis in 2020 has occasioned a further wave of sacramental manipulation, desacralization, and deprivation that has left almost no Catholic in the world unharmed. These disturbing ýýýsigns of the timesýýý call for an unsparing reassessment of official and unofficial policies, practices, customs, and attitudes, along with fresh appreciation for ýýýcreative minoritiesýýý that are taking a different, more difficult, and more successful path to reverence. The Holy Bread of Eternal Life is a powerful and timely book by scholar Peter Kwasniewski that exalts the divine gift of the Blessed Sacrament, which can never be too much adored, too much loved, too much cared for, or too muc

## The Priesthood of All Believers and the Missio Dei

The priesthood of all believers is a pillar undergirding Protestant ecclesiology. Yet the doctrine has often been used to serve diverse agendas. This book examines the doctrine's canonical, catholic, and contextual dimensions. It first identifies the priesthood of all believers as a canonical doctrine based upon the royal priesthood of Christ and closely related to the believer's eschatological temple-service and offering of spiritual sacrifices (chapters 1-3). It secondly describes its catholic development by examining three paradigmatic shifts, shifts especially associated with Christendom (chapters 4-6) and a suppression of the doctrine's missional component. Finally, the book argues that a Christian doctrine of the priesthood of all believers should be developed with a Christocentric-Trinitarian understanding of the missio Dei. This suggests there are especially appropriate ways for the royal priesthood to relate to the Father, to the Son, and to the Holy Spirit. A canonically and catholically informed priesthood of all believers leads contextually to particular ecclesial practices. These seven practices are 1) Baptism as public ordination to the royal priesthood; 2) Prayer; 3) Lectio Divina; 4) Ministry; 5) Church Discipline; 6) Proclamation; and 7) the Lord's Supper as the renewal of the royal priesthood.

## The Gift of Infallibility

Infallibility is a deeply misunderstood idea, within as well as outside the Catholic Church. It remains a subject of great theological debate, especially regarding papal infallibility and the ordinary magisterium

of the Church. In *The Gift of Infallibility*, theologian James T. O'Connor clarifies the idea of infallibility. He provides a helpful translation of the *relatio* or official explanation by Bishop Gasser given at Vatican I, the Church council that defined the dogma of papal infallibility. Also included in this important volume is the first draft of chapter 4 of the Dogmatic Constitution *Pastor Aeternus*, as well as the final, official chapter of the constitution. Despite its importance in all theological discussions on the doctrine of infallibility, Bishop Gasser's *relatio* had never until recently been translated from the Latin original into English. The *relatio* reveals a mind which is logical in process and fully acquainted with the historical and theological aspects of the question. This volume concludes with a recently updated theological summary on the topic of infallibility by Father O'Connor. *The Gift of Infallibility* is immensely important for theologians and others who wish to understand the way by which the Holy Spirit safeguards the Church. It will be of great value to the general student as well as to the specialist.

#### The Blessed Virgin Mary In England:

"O Blessed Confidence, O Safe Refuge, Mother of God and Our Mother!" St. Anselm of Canterbury (1033?1109), Doctor of the Church "What is not generally known and only infrequently studied is the role of Our Lady over the centuries as a catechist: teacher of the faith, in a very real sense, primary teacher because she is Mother of God and Mother of the Church and faithful. If any one factor might be singled out for the very high level of faith and religious practice in medieval 'merry England' (merry, because Mary's dowry, because consecrated to Mary as her possession and property) it is this Marian catechesis. Only when England deliberately rejected Mary did it cease to be the happy place it once was. Unfortunately, English colonization of other peoples took place only after the repudiation of Mary by England. That is why this catechetical work is especially valuable for the faithful and those who are seeking faith in America and other English speaking cultures. It will bring to their attention precisely what is central to catechetics and so often missing, the presence of Mary, Mother and Teacher. It will make perfectly clear why we need not fewer Marian sanctuaries, but many, many more in all parts of the country where this quiet, but so real and profound influence of the Marian principle of the Church will be felt at every level. It is my prayer and hope that those who read and study this work will find the same inspiration and stimulus that I found in having the privilege to read the manuscript before publication. We are much indebted to Brother Anthony Josemaria Pasquale, a Franciscan Tertiary of the Immaculate and gifted scholar, for the effort he has expended to find qualified contributors and to offer so well edited a book to the general public." -From the Foreword by Father Peter M. Fehlner, FI, theologian, sponsor of the International Symposium on Marian Coredemption

#### The Sacrament of the Eucharist

In *The Sacrament of the Eucharist*, the latest volume in the *Lex Orandi* Series, John D. Laurance considers the Eucharist by way of two questions: How, by his first-century life, death, and resurrection, does Jesus Christ save all human beings throughout history from eternal death and make possible their permanent union with God? How is that salvation made available now through the community of the church in her liturgical celebrations? Soteriology and ecclesiology therefore play a prominent role in Laurance's investigation. After forging a theology of the liturgy primarily out of the work of Rahner, Kilmartin, and Chauvet, the author investigates the nature of the *lex ordandi*, *lex credendi* relationship and offers guidelines on how best to read the church's faith in her life of prayer. He then uses both steps to discover the faith meaning of a particular Eucharist as typically celebrated in a modern American parish on Sunday morning.

#### The Eucharist: Mystery of Presence, Sacrifice, and Communion

*The Eucharist: Mystery of Presence, Sacrifice, and Communion* explores the three ends of the Sacrament of Sacraments: God's true presence, His redemptive sacrifice, and spiritual nourishment through communion with Him. In this follow-up to his groundbreaking work, *Faith Comes From What Is Heard*, Lawrence Feingold constructs a biblical vision of the Eucharist from its prefigurement in the Old Testament to its fulfillment in the New and presents the Eucharistic theology of the Church Fathers, St. Thomas Aquinas, and magisterial teaching from centuries past through today. The Eucharist is a masterful text, both challenging and spiritually rich, that comprehensively examines the unspeakable mystery that is the Eucharist.

### Bread from Heaven

Bread from Heaven offers a contemporary theological synthesis on the Eucharist that brings together classical and critical biblical exegesis, debates on the early history of the Christian liturgy, patristic doctrine, the teachings offered by the Councils of Florence, Trent and Vatican II, and the Church's *lex orandi*, all within a framework provided by the Eucharistic theology of Thomas Aquinas. The volume begins with Christ's Bread of Life discourse in John 6, in light of the Old Testament theme of the manna, and the Synoptic accounts of the Last Supper. These biblical texts offer solid foundation for a theology of Eucharistic sacrifice, presence and Communion. It then continues with a historical and systematic study of the institution of the Eucharist by Christ, with special attention given to the emergence of the first Eucharistic prayers. Then follows a survey of key Christological and ecclesiological themes which undergird Eucharistic theology. The chapters on Eucharistic sacrifice and presence form the heart of the work. Here, the focus moves to key conciliar, patristic and Thomistic insights on these themes. Bread from Heaven clarifies misunderstandings of Eucharistic sacrifice and renders transubstantiation accessible to beginners. Blankenhorn concludes with a study of the consecration, the minister of the Eucharist and the fruits of communion. The chapter on the debate over the words of institution and the epiclesis gives a fresh perspective that integrates both eastern and western tradition. The study of the Eucharistic celebrant strikes a balance between a spirituality of the priest as acting in *persona Christi* and of the priest as praying in *persona ecclesiae*. The concluding chapter centers on the Eucharist's unitive, mystical fruits in the Church. This textbook is ideal for an advanced undergraduate or graduate course on Eucharistic theology. It also seeks to advance the debate on several controversial historical and speculative issues in sacramental theology.

## Seeking the Sacred with Psychoactive Substances [2 volumes]

Can drugs be used intelligently and responsibly to expand human consciousness and heighten spirituality? This two-volume work presents objective scientific information and personal stories aiming to answer the question. The first of its kind, this intriguing two-volume set objectively reports on and assesses this modern psycho-social movement in world culture: the constructive medical use of entheogens and related mind-altering substances. Covering the use of substances such as ayahuasca, cannabis, LSD, peyote, and psilocybin, the work seeks to illuminate the topic in a scholarly and scientific fashion so as to lift the typical division between those who are supporters of research and exploration of entheogens and those who are strongly opposed to any such experimentation altogether. The volumes address the history and use of mind-altering drugs in medical research and religious practice in the endeavor to expand and heighten spirituality and the sense of the divine, providing unbiased coverage of the relevant arguments and controversies regarding the subject matter. Chapters include examinations of how psychoactive agents are used to achieve altered states in Judaism, Christianity, Islam, and Buddhism as well as in the rituals of shamanism and other less widely known faiths. This highly readable work will appeal to everyone from high school students to seasoned professors, in both the secular world and in devoted church groups and religious colleges.

## The Catholic World Report

The Book of Revelation has always been a mysterious and intriguing book, describing in symbolic terms the confrontation between the Disciples of Christ and the powers - political and supernatural - that hold sway over the current age. Fundamentalists have been attracted to the book and have sought to decipher its strange symbols as coded prophecy of future events. But as Pablo Richard shows in *Apocalypse*, the most powerful readings of the Book of Revelation are through the eyes of the oppressed, living out their Christian faith in the context of the modern empire. It is they who identify most strongly with Revelation's ultimate message of hope and life in the midst of death and persecution. *Apocalypse* first provides a general introduction to the reading of Revelation by examining three keys for its understanding: the historical, the sociological, and the literary-structural. The book then goes on to explore the whole of the Book of Revelation, following the book's own structure. Each section provides a line-by-line reading of the text, establishing the literal meaning before applying the interpretive keys already established.

## Rediscovering Aquinas and the Sacraments

The *Dark Bible* explores early modern England's interactions with difficult aspects of the Bible. For the early modern reader, although the Bible was understood to be perfect, sufficient, and transcendent (indeed, the Protestant Reformation required it), it was not always experienced as such. While traditional interpretive precepts, such as the claim that all dark passages could be read in the light of clear ones, were frequently recited by early modern commentators, their actual encounters with the darkness of the Bible suggest that writers, commentators, and translators were often deeply uncomfortable with the disjunction between what the Bible should be, and what it actually was. The *Dark Bible* investigates writers' and translators' attempts to explain, accommodate, circumvent, and repair problematic texts across a range of genres and contexts. It charts early modern English use of biblical scholarship in vernacular culture and investigates how vernacular writing in various genres could give voice to questioning and confused biblical interactions. The *Dark Bible* demonstrates that early modern writers and critics engaged extensively with the Bible's difficulties, attempting to circumvent and repair problematic texts, and otherwise reconcile the darkness of the Bible with theories of the Bible's perfection and clarity.

The contributors to this volume represent a range of disciplines and denominations within Judaism and share the conviction that articulating contemporary Jewish views of other world religions is an urgent objective for Judaism. Their essays show why a Jewish theology of world religions is a priority for Jewish thinkers and educators concerned with reinvigorating Judaism's contribution to the contemporary world and maintaining Jewish identity and continuity.

## Apocalypse

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

## The Dark Bible

In this book Giles Dimock answers some the most commonly asked questions about the Eucharist that have been posed to him in his preaching and teaching. He starts off with questions on the Jewish background of Eucharist and then examines the Last Supper and its theology in the light of the Paschal Mystery. Some of the other questions deal with transubstantiation, sacrifice, Real Presence, communion, and intercommunion. Fr. Dimock's answers are both practical and ecumenical. The questions range from the straightforward "Why is the Eucharist called Holy Communion," "What is Forty Hours," to the more involved "What is said about the Eucharist in the Code of Canon Law?" Father Dimock places the teaching of the Church on the Eucharist in conciliar and papal documentation. Here is a book, appropriately appearing at the culmination of the Year of the Eucharist, that will satisfy the spiritual as well as theological curiosity of college students and seminarians studying the Eucharist, as well as probing, informed lay people. +

## The Evergreen

The author argues that Baptist theologian James William McClendon Jr's articulation of the 'baptist' vision entails an account of the real presence of Christ's body and blood that is internally faithful to that vision. Furthermore, such an account of real presence suggests that the 'baptist' vision is itself a contribution of Baptists to ecumenical Christianity. The argument is set in the context of some contemporary Baptist engagement with ecumenical Christianity, particularly historic Catholic Christianity. COMMENDATION "Aaron James shows how an ecumenically minded Baptist theologian can take up this theme with creativity, grace, and an inspiring desire to lift up our hearts toward the wondrous "sacrament of unity" and "sacrament of charity". He powerfully reminds us why this may well be the most important conversation that Christians can have today." - Matthew Levering, University of Dayton, Ohio, USA

## Jewish Theology and World Religions

A revelatory exploration of the Jewish roots of the Last Supper that seeks to understand exactly what happened at Jesus' final Passover. "Clear, profound and practical—you do not want to miss this book."—Dr. Scott Hahn, author of *The Lamb's Supper* and *The Fourth Cup* Jesus and the Jewish Roots of the Eucharist shines fresh light on the Last Supper by looking at it through Jewish eyes. Using his in-depth knowledge of the Bible and ancient Judaism, Dr. Brant Pitre answers questions such as: What was the Passover like at the time of Jesus? What were the Jewish hopes for the Messiah? What was Jesus' purpose in instituting the Eucharist during the feast of Passover? And, most important of all, what did Jesus mean when he said, "This is my body... This is my blood"? To answer these questions, Pitre explores ancient Jewish beliefs about the Passover of the Messiah, the miraculous Manna from heaven, and the mysterious Bread of the Presence. As he shows, these three keys—the Passover, the Manna, and the Bread of the Presence—have the power to unlock the original meaning of the Eucharistic words of Jesus. Along the way, Pitre also explains how Jesus united the Last Supper to his death on Good Friday and his Resurrection on Easter Sunday. Inspiring and informative, *Jesus and the Jewish Roots of the Eucharist* is a groundbreaking work that is sure to illuminate one of the greatest mysteries of the Christian faith: the mystery of Jesus' presence in "the breaking of the bread."

## A Key to the Doctrine of the Eucharist

This thoroughgoing study examines the doctrine of transubstantiation from historical, theological, and ecumenical vantage points. Brett Salkeld explores eucharistic presence in the theologies of Aquinas, Luther, and Calvin, showing that Christians might have more in common on this topic than they have typically been led to believe. As Salkeld corrects false understandings of the theology of transubstantiation, he shows that Luther and Calvin were much closer to the medieval Catholic tradition than is often acknowledged. The book includes a foreword by Michael Root.

In this insightful, interdisciplinary study, Robert Sokolowski uses the methods of phenomenology to examine Christian religious beliefs, particularly the sacrament of the Eucharist. In so doing, he comes to terms with many theological and cultural issues raised by modernity. Although the Eucharist is the center of focus, other issues in Christian faith are also examined, such as the Christian understanding of God, Creation, the Incarnation, Redemption, and biblical Revelation. Sokolowski employs a method that he calls "the theology of disclosure," which studies the structures of appearance and should be distinguished from both positive and scholastic theology. He takes appearances as objective disclosures, not as mere psychological events. When discussing the Eucharist, he shows how it uses the form of quotation and how it draws on various temporal dimensions of human existence as it reenacts the sacrifice of Christ before the eternal Father. The author also considers how Christian belief differs from other forms of religion and from modern atheism. By demonstrating how the Christian understanding of God differs from other ways of understanding the divine, he attempts to show that Christianity is not simply one religion among many but the truth of religion. These deeper themes are explored as necessary contexts for the Eucharist, which could not be properly understood except against the background of the Christian understanding of God as eternal and as Creator and Redeemer. The author provides a comprehensive theological treatment of major issues in Christian faith and does so with categories that are appropriate to our present intellectual and cultural world. This study, which draws upon the work of many classical and contemporary theologians, especially Hans Urs von Balthasar, contributes significantly to speculative theology and to Eucharistic studies. It will be of great use to theologians and philosophers, as well as to students of Christian philosophy and sacramental theology. Robert Sokolowski, a priest of the Archdiocese of Hartford, has taught philosophy at The Catholic University of America since 1963. He has written six books and numerous articles dealing with phenomenology, philosophy and Christian faith, moral philosophy, and issues in contemporary science. He has been an auxiliary chaplain at Bolling Air Force Base in Washington, D.C., since 1976 and was named monsignor in 1993.

"Indispensable for graduate and divinity programs with interests in Catholic theology and phenomenology of religions.--Religious Studies Review "Intellectually stimulating. . . . The author contributes many insights to the theology of the Eucharist, some of which I had never seen before and found enlightening and moving. The depth of his scholarship is obvious."--Rev. James T. O'Connor, St. Joseph's Seminary, New York "A careful reading of this profound analysis of the Holy Eucharist will be rewarded with a more fruitful participation at Mass. Here we find a modern model of the Catholic theologian who shows us in the concrete how to practice 'faith seeking understanding.'"--Kenneth Baker, S.J., Editor, Homiletic and Pastoral Review

#### 101 Questions and Answers on the Eucharist

In this book the author, relying on the research he carried out in Igboland, Nigeria, leads us to see the action of God's grace already active in the Igbo religious culture called Omenala Ndigbo before the coming of Christian missionaries and how these cultural values have prepared the people to receive the Gospel. But, as he points out, these cultural values on which the Christian message ought to have been built from the beginning were grossly misunderstood and neglected. The Igbo people are now mainly Christians. But because the Gospel has not yet become their culture, some of them have double allegiance to the doctrines of the Church and to the practices of Omenala Ndigbo. The author opines that to build the Catholic Church in Igboland on a solid foundation, the Eucharist must take the central place - since the Eucharist makes the Church and is the source and summit of the life of the Church. Thus the work, which uses the analytical and hermeneutical method known as inculturation,

is on Eucharistic Ecclesiology from an Igbo perspective and will be useful for the Church, both at the local and universal levels for self-understanding and renewal, ecumenism, dialogue and mission.

### Analogous Uses of Language, Eucharistic Identity, and the 'Baptist' Vision

In the Old Testament, God wrestles with a man (and loses). In the Talmud, God wriggles his toes to make thunder and takes human form to shave the king of Assyria. In the New Testament, God is made flesh and dwells among humans. For religious thinkers trained in Greek philosophy and its deep distaste for matter, sacred scripture can be distressing. A philosophically respectable God should be untainted by sensuality, yet the God of sacred texts is often embarrassingly sensual. Setting experts' minds at ease was neither easy nor simple, and often faith and logic were stretched to their limits. Focusing on examples from both Christian and Jewish sources, from the Bible to sources from the Late Middle Ages, Aviad Kleinberg examines the way Christian and Jewish philosophers, exegetes, and theologians attempted to reconcile God's supposed ineffability with numerous biblical and postbiblical accounts of seeing, hearing, smelling, touching, and even tasting the almighty. The conceptual entanglements ensnaring religious thinkers, and the strange, ingenious solutions they used to extricate themselves, tell us something profound about human needs and divine attributes, about faith, hope, and cognitive dissonance.
