Feminine Leadership, Or, How to Succeed in Business Without Being One of the Boys

"The wide range of subjects . . . provides a glimpse of the extent to which Bourdieu's theories of culture have gained widespread currency in the humanities." —David Eick, SubStance The work of Pierre Bourdieu, one of the most influential French intellectuals of the twentieth century, has had an enormous impact on research in fields as diverse as aesthetics, education, anthropology, and sociology. Pierre Bourdieu: Fieldwork in Culture is the first collection of essays to focus specifically on the contribution of Bourdieu's thought to the study of cultural production. Though Bourdieu's own work has illuminated diverse cultural phenomena, the essays in this volume extend to new cultural forms and to national situations outside France. Far from simply applying Bourdieu's concepts and theoretical tools to these new contexts, the essays in this volume consider both the possibility and limits of Bourdieu's sociology for the study of culture. "Worth the attention of those who seek to become familiar with Bourdieu or to engage with a more well-rounded familiarity with the usefulness of his social theory." —Christopher Lindsay Turner, MFS Modern Fiction Studies "This sparkling and unusually coherent collection of essays emphasizes the American reception and adaptation of Bourdieu's work. It shows how Bourdieu has been resisted and embraced and discusses how his terms and methods might be both used and modified by American academics. Theoretical reflections are productively complemented by empirical investigations of non-canonical and popular artistic expressions and by discussions of the position of women in Bourdieu's thought." —Marshall Brown, University of Washington

Feminine Leadership, Or, How to Succeed in Business Without Being One of the Boys

Today, there are a growing number of business schools, law schools, and continuing education programs in executive development and management training that offer leadership classes. Despite the growing curricular recognition of this area, there is a shortage of strong college-level texts. Leadership, second edition—a completely up-to-date anthology of key writings by well-known contributors—meets this need for a textbook that encompasses the major theories in the field of leadership. Leadership is divided into six sections. Part I provides an overview of the subject with readings that examine what leaders actually do, as well as the many myths surrounding the notion of leadership. Part II focuses on the fundamentals of leadership by taking a close look at the specific tactics people use to get their own way. These readings analyze the political games people play and the two-way nature of leader-subordinate influence. Part III considers problems that can arise from leadership gone wrong—when power and influence are abused. The major formal models of leadership that have been offered over the years are reviewed in Part IV. The next section looks at contemporary views of leadership, emphasizing reliance on maturity of subordinates for success, including leadership in the context of self-directed work teams, entrepreneurial leadership, the notion of the leader as servant, and examples of leaders who are recognized for having empowered others or for providing moral leadership. The final section examines the roles of societal and organizational cultures as they pertain to leadership. Robert P. Vecchio has updated the second edition with six new articles. Aimed at upper-level undergraduate and graduate-level courses, Leadership continues to provide classic essays by the major figures in the field of leadership along with topical essays on current and emerging issues.

ECMLG2008-Proceedings of the 4th European Conference on Management Leadership and Governance

In an inventive and controversial collection of essays, sociologist Susan Krieger considers the many forms of wealth, both material and emotional, that women pass on to each other. This domestic heritage—the "family silver"—is the keystone for a discussion of mother-daughter relationships, intimate

relationships between lesbians, ties between students and feminist teachers, the dilemmas of women in academia as well as in the broader work world, and the importance of female separatism. Drawing on her experiences as a lesbian, a feminist, and a teacher, Krieger presents a stunning critique of higher education. She argues for acknowledging gender in all areas of women's lives and for valuing women's inner realities and outer forms of expression. Krieger has developed a distinctly feminist approach to understanding and scholarship. Her style is self-revelatory, emotional, and at the same time deeply analytical. Her essays pioneer a new method of locating, defining, and honoring female values. The Family Silver includes a thought-provoking discussion of gender roles among women, including the author's experience of being mistaken for a man; an exploration of teaching in a feminist classroom; and a description of the controversy that resulted when the author refused to allow a hostile male student to take one of her courses. Beautifully written, The Family Silver addresses issues of central concern to feminists, postmodernists, and queer theorists and encourages new insights into how gender profoundly affects us all.

Pierre Bourdieu

With a comprehensive new introduction by the author, a reissue of the influential text on women's humor

Leadership

The overall aim of this volume is to present the research studies carried out in the Middle East and Asia in the fields of culture and gender and their influence on leadership in particular. The cultures and practices of these geographical regions are very much varied and this book, Culture and Gender in Leadership: Perspectives from the Middle East and Asia, brings together analyses of these themes in selected countries of these two regions. The chapter authors use detailed descriptions, case studies and vignettes to speak to the cultural relativism and gender in leadership in these countries and provide a unique and comparative perspective drawn from their own cultures. This volume also contributes to the development of theory and empirical research found in these regions and through the collective efforts presented in this book, attempts to strengthen the body of knowledge and practice in the fields of culture and gender in leadership. As Asia is becoming the engine of economic growth for the world and Arab Spring is opening up new vistas in the Middle East, this book is a must read.

The Family Silver

Table of contents.

They Used to Call Me Snow White ... But I Drifted

Based on personal interviews and historical and psychological research, this book examines the complex relationships women share with their mothers and grandmothers and considers how those relationships and society's changing attitudes shape the experience of professional women.

Culture and Gender in Leadership

This book examines women's access to leadership roles and how these roles are perceived in society. It represents one of the first scholarly examinations of the burgeoning field of leadership. Using real-life examples and case studies of prominent women, Dr. Klenke explores the complex interactions between gender, leadership, and culture. Topics include the changing conceptions of leadership, women leaders in history, contemporary leadership theories, barriers to women's leadership, and women leaders worldwide. This volume is of primary interest to educators and students involved in women's studies programs as well as in courses in gender and leadership.

Women and Men in Management

In this fascinating collection of writings, Srilatha Batliwala, feminist thinker and practitioner, explores the many dimensions of what empowerment means for, and to, women. Looking back on a life lived through commitment to a cause—rather than to an organisation or to a sector—and working for it at many levels and locations, she traces the evolution of the concept from the late 1980s till now, unravelling its ambiguities, highlighting insights gained through practice, and analysing how and why it has been depoliticised and reduced by the state and aid agencies. Along the way, Batliwala traverses key sectors, including education for women, politics outside political systems, grassroots movements,

energy for sustainable development, and a controversial questioning of a rights-based approach to women's equality.

Broken Patterns

"At the heart of the authors' analysis is the metaphor they propose to replace the outdated idea of the glass ceiling: the labyrinth. This new concept better captures the varied challenges that women face as they navigate indirect, complex, and often discontinuous paths toward leadership."--BOOK JACKET.

Women and Leadership

The Australian workforce is amazingly diverse, with men and women bringing a huge range of cultural backgrounds, skills and life experiences to their jobs. But this diversity, with all its potential for cleverness and creativity, is not reflected in the ranks of senior business and corporate leaders. Amanda Sinclair argues that Australian organisations are clinging to an outdated concept of leadership. We expect our leaders to be a certain type of person—a tough, heterosexual male. Drawing on interviews with senior executives, male and female, she shows convincingly why our faith in this traditional style of leadership is so strong—and misplaced. *Doing Leadership Differently* is essential reading for both established and aspiring executives and managers. It offers a challenging and original analysis of: why the traditional style of leadership has failed us how men as well as women can benefit from understanding how gender shapes leadership style how to put power and sexuality at the heart of effective leadership ways of widening the pool of Australian leadership talent.

Engaging with Empowerment

Includes established theories and cutting-edge developments. Presents the work of an international group of experts. Presents the nature, origin, implications, and future course of major unresolved issues in the area.

Through the Labyrinth

This expanded and thoroughly updated edition of the popular anthology assembles the best book excerpts, articles, and reports that define and drive the field of educational leadership today. Filled with critical insights from respected authors, education researchers, and expert practitioners, this comprehensive volume features twenty-six chapters in six primary areas of interest: Principles of Leadership, Moral Leadership, Culture and Change, Standards and Systems, Diversity and Leadership, and the Future of Leadership.

Doing Leadership Differently

Bringing together international scholars this book explores how ideologies about masculinities have shaped police culture, policy & institutional organization from the 18th century to the present day. It provides an in-depth study of how gender ideologies have shaped law enforcement & civic governance under 'old' & 'new' police models.

Handbook of Psychology, Industrial and Organizational Psychology, CafeScribe

Organizational Behavior concisely covers the essential theories and concepts students need to understand about behavior in organizational settings in the twenty-first century. Readers interested in management will find insight into their own behavior and the behavior of others to help them perform effectively in organizations. Champoux has carefully selected the topics and built them into frameworks useful for explaining, analyzing, and diagnosing organizational processes. Covering both micro and macro perspectives on organizational behavior, the book includes new topics on leadership styles, generational differences, and technology in the workplace as well as plenty of examples to help students understand the application of various concepts and theories. Upper-level students of organizational behavior will find the book a useful explanation of managerial and organizational situations. A companion website, featuring instructor manual, test bank, and PowerPoint slides, provides additional support for students and instructors.

The Jossey-Bass Reader on Educational Leadership

"This rich explorative book examines the intricacies of gender, sexuality, ethnicity and class and how these complex influences weave their patterns in the daily lives of leaders. It achieves the difficult balance between acknowledging differences as well as unifying elements. The book also raises many questions about the context for leadership and examines the central issues of: leadership for what? What are leaders there to do - and for whom? To ensure that students achieve higher examination scores, or to promote equity and social justice? This book offers many fresh insights into these and other important questions." Professor Kathryn Riley, Institute of Education, University of London This book features chapters by leading international scholars on gender and educational leadership. Drawing on research in schools in the United Kingdom, Australia, New Zealand, Sweden, the United States and Canada, it introduces new discussions about the impact of gender, race, class, institutional setting and recent ideologies on leadership discourses. The book shows how early research has over-emphasized gender stereotypes and tended to simplify and polarize the ways men and women lead. Looking at differences and similarities in how men and women take on and exercise leadership roles, the authors counter essentialist claims based on biological, psychological and sociological theories that stress gender difference. The discussions employ sophisticated understandings of gender relations and leadership discourses in today's globalized context. The book is for students and scholars studying leadership and for leaders in different educational contexts around the world.

A History of Police and Masculinities, 1700-2010

BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals, entrepreneurs and corporate executives. Every month, BLACK ENTERPRISE delivers timely, useful information on careers, small business and personal finance.

Organizational Behavior

In *Breaking the Mold*, Lotte Bailyn argues that society's separation of work and family is no longer a tenable model for employees or the organizations that employ them. Unless American business is willing to radically rethink some of its basic assumptions about work, career paths, and time, both employee and employer will suffer in today's intensely competitive business environment. Bailyn's message was bold when this book was originally published in 1993. Now thoroughly updated to reflect the latest developments in the organization of work, the demography of the workforce, and attitudes toward the integration of work and personal life, this second edition is even more compelling. Bailyn finds that implementation of policies designed to allow "flexibility" is rarely smooth and often results in gender inequity. Using real-life cases to illustrate the problems employees encounter in coordinating work and private life, she details how corporations generally handle these problems and suggests models for innovation. Throughout, she shows how the structure and culture of corporate life could be changed to integrate employees' other obligations and interests, and in the process help organizations become more effective. Drawing on international comparisons as well as many years of working with organizations of various kinds, Bailyn emphasizes the need to redesign work itself. *Breaking the Mold* allows us to rethink the connections between organizational processes and personal concerns. Implementation of Bailyn's suggestions could help employees to become more effective in all realms of their complicated lives and allow employing organizations to engage their full productive potential.

Leadership Gender And Culture In Education

Women in pain populate every congregation. Left to themselves, many will become discouraged and leave the church. But pastors cannot adequately care for the needs of everyone. Beverly White Hislop has written *Shepherding a Woman's Heart* to challenge pastors to infuse to women in their churches with the same spirit that moves them to care for their flock. This amazing resource provides substantial guidance on how to properly equip healthy women to come forward and nurture hurting women.

Black Enterprise

While Experiential Learning has been an influential methods in the education and development of managers and management students, it has also been one of the most misunderstood. This Handbook offers the reader a comprehensive picture of current thinking on experiential learning; ideas and examples of experiential learning in practice; and it emphasises the importance of experiential learning to the future of management education. Contributors include: Chris Argyris, Joseph Champoux, D. Christopher Kayes, Ruth Colquhoun, John Coopey, Nelarine Cornelius, Elizabeth L. Creese, Gordon Dehler, Andrea Ellinger, Meretta Elliott, Silvia Gherardi, Jeff Gold, Steve G. Green, Kurt Heppard, Anne

Herbert, Robin Holt, Martin J. Hornyak, Paula Hyde, Tusse Sidenius Jensen, Sandra Jones, Anna Kayes, Kirsi Korpiaho, Tracy Lamping, Enrico Maria Piras, Amar Mistry, Dale Murray, Jean Neumann, Barbara Poggio, Keijo Räsänen, Peter Reason, Michael Reynolds, Clare Rigg, Bente Rugaard Thorsen, Burkard Sievers, Stephen Smith, Sari Stenfors, Antonio Strati, Elaine Swan, Jane Thompson, Richard Thorpe, Kiran Trehan, Russ Vince, Jane Rohde Voight, Tony Watson, and Ann Welsh.

Breaking the Mold

A fascinating, important study. . . Highly recommended. E. Hu-DeHart, Choice This accessible and original book relates the fascinating story of successful women across the Americas: women who are managers, business owners, university professors and administrators, doctors, lawyers and government ministers. Based on extensive research, including more than 1,100 surveys and 300 interviews of women from Argentina, Barbados, Brazil, Canada, Chile, Jamaica, Mexico, St Vincent and the Grenadines and the USA, the book aims to explain what these women have in common and how they differ. The workplace challenges and barriers to professional success faced by women are also analysed. Seeking to capture the voices of the women themselves, the authors also from a wide range of backgrounds and cultures across the Americas attempt to explain success in the face of personal, social, organizational, cultural and economic obstacles facing women everywhere. Successful Professional Women of the Americas will provide fascinating reading for academics, students and researchers focusing on gender studies or business and management. Professional women and managers worldwide will also find the book to be of great interest.

Shepherding A Woman's Heart

This cross-disciplinary text is designed to appeal to a diversity of social science scholars. The central focus is on new ways of viewing the career, or how working lives unfold over time. Fresh views from psychology, social psychology, sociology, anthropology, organization theory, economics, and political science are among those represented in the twenty-five chapter anthology. The design of the handbook in three parts - current approaches, new ideas, and future directions - is intended to engage the reader in the debate from which new and better career theories can be developed.

Handbook of Experiential Learning and Management Education

Impression management theory has been popular in sociology and social psychology for many years. This volume offers the first comprehensive application of impression management theory to organizational settings. Researchers and practitioners in organizational settings have recently been using this theory as an explanatory model to focus on the roles and identities that "social actors" utilize in interpersonal situations. The theory of impression management provides a framework for the techniques and strategies people use in order to look good as well as the excuses and justifications they employ to avoid looking bad.

Successful Professional Women of the Americas

. . . a thorough and insightful examination of women on corporate boards of directors. . . I recommend the book as a read for practitioners, scholars, educators and others having an interest in human resource management. . . With its wealth of information, Women on Corporate Boards of Directors is a good addition to the extant literature that should represent an affordable value for the buyer. Mark Mone, Personnel Review After the first two chapters I was so absorbed I was almost reluctant to go to coffee and, as other coffee addicts will know, it is a rare book, especially a rare academic book that can make one careless in observing the customary coffee break. . . I found that the way this book is written helped me to reflect on much of the gender research that I am involved in currently because the questions raised are so searching and far-reaching. Once again, the chapter authors combine brevity with thoroughness and depth in their examination of the themes, which made this a very rewarding book because it takes you so far in your thinking in just 240 pages. . . I feel energised by the debates that the book has opened up for me. I have done research in this particular area, but I now feel that I have explored different perspectives and new depths and I am grateful to the editors for that. Marianne Tremaine, Gender in Management: An International Journal This timely collection of case studies and research from top academics around the world, will be of tremendous value to all those engaged in bringing about greater gender diversity in corporate boardrooms. Jacey Graham, Brook Graham LLP This book provides an excellent overview of contemporary international research and practice relating to women on corporate boards of directors. An important lesson learnt from this book

is: rather than having only one or two competent and committed women on the boards of directors, an ideal number of three is not only the right thing but also the bright thing to do. Why? Research has documented a strong positive correlation between the share of board seats held by women and financial performance. Martin Hilb, University of St. Gallen, Switzerland There are still common barriers that women face across many countries that keep their representation on boards of directors low and relatively unchanging. I commend this excellent, outstanding book to both academics and business management constituencies, as well as individuals interested in serving on corporate boards. The authors should be congratulated for this important contribution to the literature. Marilyn Davidson, The University of Manchester, UK This important new book addresses the growing international interest in women on corporate boards of directors. The contributors explore the position of women on corporate boards and future trends in different countries including Australia, Canada, France, Iceland, Jordan, New Zealand, Norway, Spain, Tunisia, the UK and the USA. They go on to report the latest research on the experiences and different contributions made by women directors on corporate boards. Issues discussed include: How women directors champion difficult issues and debates How women influence boardroom behaviour The contribution of women directors human and social capital Gendered experiences and the glass cliff The glass ceiling or a bottleneck? Networking to harness local power for national impact Women on board in best practice companies Whether critical mass makes a difference? Future directions for research. Women on Corporate Boards of Directors brings together the significant international research base with suggestions aimed at individuals aspiring to board membership, women and men currently serving on corporate boards, companies interested in attracting women to their boards, and government bodies wanting to identify the challenges and opportunities facing them as they consider various options for increasing women's representation on corporate

Handbook of Career Theory

The role of women in the workplace has rapidly advanced and changed within the previous decade, leading to a current position in which women are taking over leadership roles and being offered these positions more than ever before. However, a gap still exists with the representation of women in the workforce especially in power positions and roles of authority in organizations. While the representation of women in leadership roles is impressive and exciting for the future, women still face many challenges when taking over these positions of power and face many issues related to gender inclusivity. There is also still gender bias and discrimination against women who have been given the opportunity to become authority figures. It is essential to acknowledge and discuss these critical issues and challenges that women in leadership roles must handle to better understand the current climate of gender roles across various industries and types of leadership. The Research Anthology on Challenges for Women in Leadership Roles discusses the role of women in positions of authority across diverse industries and businesses. By reviewing the biases, struggles, discrimination, and overall challenges of being a woman in a powerful role, women leaders can be better understood for their role in a male-dominated world. This includes topics of concern such as equal treatment, proper implementation of women's policies, social justice activism, discrimination, and sexual harassment in the workplace, and the importance of diversity and empowerment of women in leadership positions with chapters pertaining specifically to African-American, Hispanic, Asian, and Middle Eastern women. This book is ideal for professionals, researchers, managers, executives, leaders, academicians, sociologists, policymakers, and students in fields that include humanities, social sciences, women's studies, gender studies, business management, management science, health sciences, educational studies, and political sciences.

Impression Management in the Organization

Investigates how notions of masculinity and femininity inform ideology, political action, and institutional prejudice

Women on Corporate Boards of Directors

This book explains why the earliest cities had grid-form street systems, what conditions led to their being overwhelmingly preferred for 5000 years throughout the world, why the Founding Fathers wanted gridform cities and how they affect economic transactions. Real property has been instrumental in forming urban settlements for 5000 years, but virtually all urban form commentary, theory and research has ignored this reality. The result is an incomplete and flawed understanding of cities. Real

property became a means of arranging spatial patterns caused by millennia of human evolutionary and historical developments with respect to access and movement. As a result, access to resources of all types became a regulatory mechanism controlled, at least in part, by real property ownership. The effects of real property on urban spatial patterns are currently best seen by examining American urban space, which has changed significantly over the past 200 years. This change, which began in the 1840s and established path dependence through a combination of design thought, sentimental pastoralism and financial prowess resulted in an urban regime shift that diminished economic resilience. This book offers a rethinking of how real property relates to real space, examines the thought of form promoters, links space, property, neurological evolution and settlement form, shows access is measurable and describes the pluses and minuses of functionalism, rent seeking, general purpose technology, grid-form street systems and what the American Founding Fathers thought about urban form.

Research Anthology on Challenges for Women in Leadership Roles

This book presents boards of directors from a strategic and entrepreneurial management perspective. Boards of directors are receiving increased interest in the business world as well as among academic audiences however few contributions integrate corporate governance and organizational behavior. In this book a research stream about value-creating boards is introduced. Boards of directors have during the recent decades mostly been studied within a framework of corporate governance where the interests of external investors are emphasized. This book aims to go further and explore actual board behavior. The framework and the contributions in the book include concepts such as: board leadership and structure, boardroom decision-making, board task performance corporate entrepreneurship and innovation boards in small and medium-sized firms board diversity and women directors The book also presents the results of a research agenda about value-creating boards which was conducted throughout various European countries.

Gender Power, Leadership, and Governance

Much has been written about a model of leadership that emphasizes women's values and experiences, that is in some ways distinct from male models of leadership. This book redirects the focus to a view of leadership as a multicultural phenomenon that moves beyond dualistic notions of "masculine" and "feminine" leadership, and focuses more specifically on leadership as the management of meaning, including the meanings of the notion of "organizational leader." This volume focuses on leadership "traditions" revealed in the history of Black women in America and exemplified in the leadership approaches of 15 African American women executives who came of age during the civil rights and feminist movements of the 1960's and 1970's and climbed to the top of major U.S. organizations. It advances a vision of organizational leadership that challenges traditional masculine and feminine notions of leadership development and practice, providing insights on organizational leadership in the era of post-industrialization and globalization. Additionally, by placing African American women at the center of analysis, this book provides insights into the ways in which race and gender structure key leadership processes in today's diverse and changing workplace. It is a must-read for scholars and researchers in organizational communication, management, leadership, African American studies, and related areas.

Access, Property and American Urban Space

An engaging and thought-provoking textbook which introduces and reviews the main methods and constructs used to assess people at work.

The Value Creating Board

This book is an accessible entry point into the theory and practice of work reflection for students and practitioners. Taking a cross-disciplinary approach, it covers management, education, organizational psychology and sociology, drawing on examples from Europe, the Middle East, North America and Australia. It traces reflection at work from an emphasis on training, through a focus on how organizations learn, to a concern with the necessary learning groups to operate effectively. It emphasizes productivity combined with satisfying lived experience of work life and points the way to a new collective focus on learning at work.

Race, Gender, and Leadership

This book is a collection of reflections and empirical studies which examine the many facets of the meanings of work. The authors are significant scholars in fields of study ranging from ethics to sociology. The book is a text which aims at balancing the academic with the practical and so the chapters often reflect the tensions implicit in such a venture. The reader will find in these pages historical, philosophical, educational, religious, entrepreneurial and many other points of view which combine to emerge as a text which is both encyclopedic in information yet engaging and lively in style. The reader will be able to understand how the meanings of work have changed over the centuries varying according to historical place and point of view. At the same time, the diligent reader will observe the centrality that work has in the lives of people both practically and in terms of life quests. Work has previously been defined as an activity that produces something of value for other people. This definition does not even begin to include the information about work that is presented in this book. The reader will feel a invigorating sense of worth from this book.

The Psychology of Personnel Selection

The present environment for research and development in business can be characterized in two simple words: inconsistent horizons. As the rapid development of technology and the number of new scientific discoveries have led to tremendous change, businesses have modified their entire corporate structure, downsizing, and operating in a constant state of flux. This environment with its inconsistency makes R&D a risky venture. Total Quality in Research and Development looks at these problems and presents models, systems, and paradigms that offer a systematic improvement process for businesses and their management. The unparalleled challenge faced by those working in R&D functions is examined, offering beneficial approaches for implementing total quality improvement efforts. This book shows how TQ promotes rather than stifles inventiveness, ingenuity, and individual accomplishment. Through collaborative efforts, both team and individual performance initiates and maintains clear objectives as well as produces the optimal environment for the prospering of research. The total quality systems presented here are not just a system, method, or philosophy, but rather a working model for daily operations. This valuable and practical working model examines actual daily work practices, guideposts and measurements for success, and management practices that stress creativity and group achievements that support company goals.

Productive Reflection at Work

Globally, women are facing social, economic, and cultural barriers impeding their autonomy and agency. Accelerated women empowerment programs often fail to attain their targets as envisaged by the policymakers due to a variety of reasons, with the most prominent being the deep-rooted cultural norms ingrained within society. In the era of globalization, empowerment of women demands new approaches and strategies that encourage the mainstreaming of gender equality as a societal norm. The Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment is a critical scholarly publication that examines global gender issues and new strategies for the promotion of women empowerment and gender mainstreaming in various spheres of women's lives, including education and ICT, economic participation, health and sexuality, mental health, aging, law and judiciary, leadership, and decision making. It provides a comprehensive coverage of all major gender issues with novel ideas on gender mainstreaming being contributed by men and women authors from multidisciplinary backgrounds. Gender perspective and intersectional approach in the discourses make this handbook a unique contribution to the scholarship of social sciences and humanities. The book provides new theoretical inputs and practical directions to academicians, sociologists, social workers, psychologists, managers, lawyers, policy makers, and government officials in their efforts at gender mainstreaming. With a wide range of conceptual richness, this handbook is an excellent reference guide to students and researchers in programs pertaining to gender/women's studies, cultural studies, economics, sociology, social work, medicine, law, and management.

Values, Work, Education

" Reworking Gender is a remarkable analysis of the intersections of discourse, gender, and organizing that not only addresses contemporary metatheoretical concerns but also illuminates these issues with archival and interview data. . . . Reworking Gender systematically lays out arguments for the importance of work in our field, for communication's connections with and potential contributions to related disciplines, and for possible ways in which researchers can continue to challenge boundaries between presumably incommensurable discourses. Without a doubt, Reworking Gender will prove to be

a landmark book in feminist, critical-cultural, organization studies, and organizational communication theorizing." --Patrice M. Buzzanell, *Purdue University Reworking Gender: A Feminist Communicology of Organization* examines the place of gender and feminist scholarship in contemporary critical organization studies. Departing from the common view of gender as a specialized branch of organization scholarship, authors Dennis K. Mumby and Karen Lee Ashcraft reposition feminism in a communication-centered model that integrates recent developments in feminist, critical, and postmodern organizational studies. Linking theory to practical projects, the authors address many of the complex and often contradictory concerns of critical organizational scholarship, including issues of discourse, subjectivity, power, race, and class. In a compelling and timely fashion, this important volume explores Gendered organization studies in the wake of the discursive turn The dynamic relationship between gender and organization The social construction of gendered work identities The intersection of gender, race, sexuality, and class The dialectical relation of power and resistance With its interdisciplinary approach, *Reworking Gender: A Feminist Communicology of Organization* will be of significant interest to scholars and graduate students in such fields as organizational communication, management and organization studies, sociology, and gender studies.

Total Quality in Research and Development

Barriers which hinder career advancement of women are complex and varied. They have become top agenda items for most corporations and the government. The "glass ceiling" is a term that symbolizes a variety of barriers that prevent qualified individuals from advancing higher in their organization. Although many women hold management positions, few have made the breakthrough to top-level positions. To determine what conditions are required for women to attain top executive positions, an ethnographic study was conducted at a hospital. The study was limited to four women who held executive positions: one associate administrator, one interim associate administrator, one director and the CEO. An in-depth data gathering technique using observation, interviews and documentation was used to investigate factors such as education/skills, influences, support, barriers and corporate culture. The findings revealed: (a) having opportunities to be participating, valued family members and to compete in activities while young helps girls to develop a sense of competence and mastery; (b) education, credential building experiences, certain competencies and being willing to take risks are necessary for success; (c) having certain attitudes and philosophies are crucial factors in their success; (d) mentors, network involvement and relationships with peers does affect mobility; (e) the women did have a career plan, not in the sense of a linear career plan, but rather one in the form of the spiral career concept; (f) the hospital is a structure which provides opportunities to develop careers; (g) the women understand, accept and have learned to adapt to the culture of the society in which they live and work; (h) the women are savvy at expressing, affirming and communicating the substance of their culture to others; (i) the amount of prejudice a woman encountered depended upon several components; and (j) the barriers to advancement experienced by the women do not confirm those discussed in the review of literature. Further research is recommended on the qualifications of male and female CEOs, educational programs most appropriate for female executives, how successful female executives learned to deal with their barriers and why certain organizations do not have top female executives.

Handbook of Research on New Dimensions of Gender Mainstreaming and Women Empowerment

In response to the COVID-19 pandemic, many educational institutions across the globe had to close in-person learning and turn to online learning. Previous predictions on the future of education discussed the globalization of education through online learning that breaks down geographical barriers. However, many students, parents, and educators are still finding it challenging to adapt to new methods of instruction. Creating global and multicultural classrooms creates additional challenges, especially when considering diverse, at-risk, and low-income student populations. Further study of these challenges is required to improve the future of global education. *Contemporary Issues in Multicultural and Global Education* discusses research, strategies, best practices, and insights dealing with important issues related to multicultural and global education. Covering topics such as remote learning and sustainable leadership, this premier reference source is ideal for educators, policymakers, administrators, curriculum designers, researchers, academicians, and students.
