### Fundamentals of Human Resource Management, eBook, Global Edition

The role of the employees working for a business activity of any organization is very crucial. Every industrial organization must strive for getting the best quality of works from its employees at a higher grade of productivity. For better results in terms of organizational growth, prosperity and development of individuals working, higher-grade productivity and quality are essential. Most of the time it is always believed that the man behind the machine is more important than any other factors of production. Therefore, more important thing is to understand the necessities of the employees as human beings, and their various aspects responsible for employee motivation to work with efficiency and effectiveness. The prime objective of this book is to provide its readers with the basic knowledge of various aspects of the employees as human beings which determines their motivation level to produce better results for the organization. I strongly believe that the managers, executives and even entrepreneurs who are engaged in managing human resources for their professional business organizations shall be benefited from the use of this book. Also, this book will be most useful to those management students who are pursuing their MBAs in the subject of human resources.

Thoroughly updated and revised, this Second Edition is the only book currently on the market to present the most important and commonly used methods in human resource management in such detail. The authors clearly outline how organizations can create programs to improve hiring and training, make jobs safer, provide a satisfying work environment, and help employees to work smarter. Throughout, they provide practical tips on how to conduct a job analysis, often offering anecdotes from their own experiences.

### A Framework for Human Resource Management

This book was written to address the need for timely, thorough, practical, and defensible job analysis for HR managers. Under continuing development over the past 50 years, Functional Job Analysis (FJA) is acknowledged by major texts in HR and industrial/organizational psychology as one of the premier methods of job analysis used by leading-edge organizations in the private and public sectors. It is unique among job analysis methods in having its own in-depth theoretical grounding within a systems framework. In addition to providing a methodology for analyzing jobs, it offers a rich model and vocabulary for communicating about the competencies (skills) contributing to work success and about the design of the work organization through which those competencies are expressed. FJA is the right theory and methodology for future work in an increasingly competitive global economy. This book is the authoritative source describing how FJA can encourage and support an ongoing dialogue between workers and management as they jointly pursue total quality, worker growth, and organization performance. It is a flexible tool, fully recognizing the rapid changes impacting today's organizations. It

is a comprehensive tool, leading to an in-depth understanding of work, its results, and its improvement in a unique organization context. It is a humane tool, viewing workers in light of their full potential and capacity for positive growth. With FJA, workers and managers can work more constructively together in a wholesome and productive work relationship.

### Enhanced ebook for Human Resource Management [Global Edition]

Research Paper (undergraduate) from the year 2009 in the subject Leadership and Human Resource Management - Miscellaneous, grade: 1, University of Zagreb (University of Zagreb), course: Aftergraduate study for business management - MBA, language: English, abstract: Modern business policy is based upon successful management of resources, especially human resources. Employment

and recruitment are becoming human resource basic functions. Companies and organizations must consider again their own business policy and goals, in order to define and realize optimal business policy, particularly human resources recruitment. Recruitment of internal candidates is almost a rule for solving the problem of shortage in certain profile of employees. Yet, mostly, in the situation of insufficient human resources, we focus our attention to external candidates, through cooperation with media, educational institutions, agencies and other communication approaches. Media have emphasized role. Advertising on the Internet, newspapers and TV depends on many variables. Besides cost aspect there is significance in communication aspect, an rising attention onto target group from which we plan to recruit our candidates. Therefore, media role is growing in importance, not only in sales, public relations or promotion, but also in employment, actually, in recruitment of human resources from external sources. Choice of an appropriate media and an adequate message in advertising are becoming more important for the communication effects of employment process, as well as advertising itself. In the Internet domination era and development of new communication approaches (social networks and Internet forums), individuals and organizations are focusing their attention to this media and its potential. Growing number of opportunities and target markets' new value system are recognizable through growing number of Internet sites, portals, but also in the Internet browser influence (Google, Yahoo, Bing...). Campaigns for recruitment of new employees through open employment tender invitations on Internet sites of all sorts of companies and organizations are part of this new approach to human resources. Systematic approach, openness to new opportunities and media, development and focus onto new potentials and resources are part of postulates for business survival.
