A-Level Media Studies - Black Panther Part 2 - Industries - A-Level Media Studies - Black Panther Part 2 - Industries by Mrs Fisher 28,985 views 4 years ago 13 minutes, 24 seconds - PART 2 - Simple guide for students and teachers of Media Studies to Black Panther and film industries.

Marvel is a diversified company, making comics, graphic novels, films, animations, TV etc.

They chose to retain the rights to Black Panther as a character because they knew they wanted to make a film about him at some point

Maybe Marvel and Disney chose to make the film to cash in' on the current social and cultural context of people wanting more diversity in the media.

The diverse and positive representations in the film make the film stand out as different in Hollywood, and may make it appealing for audiences.

Black Panther was given a 12A certificate in the UK by the BBFC

Some people argued that Black Panther had a lot of violence in it for a 12A certificate. There is an argument that audiences should expect a certain level of violence in a Marvel superhero movie

Some also might argue that the violence in the film is fantasy based' which qualifies it for a lower certificate according to the BBFC guidelines.

Regulation is challenging when you are trying to distribute your film globally, and you want to try and follow different regulations of different countries.

Producers also have to bear in mind the different regulation in other countries for the marketing materials as well as the film itself

The range of posters produced with different characters on, helps to target a diverse range of audiences.

A separate poster was Specifically designed to market the film in China. which some say reflects the country's different attitudes towards race
