Research Methodology in Strategy and Management

Research methods present the strategic management field with opportunities and challenges. This second volume describes challenges and opportunities inherent in particular content areas, examines key ontological and epistemological issues in the strategic management context and also describes how strategy researchers can use particular methods.

Research Methodology in Strategy and Management

Research methods present the strategic management field with several opportunities and challenges. This volume includes three types of chapters aimed at exploiting the opportunities and meeting the challenges. Collectively, they offer thinking about research methodology provided by intellectual leaders within the strategic management field.

Research Methodology in Strategy and Management

Strategic management relies on an array of complex methods drawn from various allied disciplines to examine how managers attempt to lead their firms toward success. This book discusses about key methodology issues in the strategic management field.

Research Methodology in Strategy and Management

This volume is part of a series which provides a forum for critique, commentary, and discussion about key research methodology issues in the field of strategic management.

Research Methodology in Strategy and Management

Offers twelve chapters of discussion surrounding various tools and methods utilized by scholars and academics. This title covers a range of approaches for strategists, managers, and researchers.

Research Methodology in Strategy and Management

The field of strategic management has developed significantly since its birth from "business policy" and "business planning" in the 1960s. Pioneering studies were essentially normative, prescriptive, and often based on in-depth case studies. The evolution of strategic management into a respected field of academic study resulted from the adoption of research methods previously employed in economics. Today, research in strategic management is likely to employ a mixture of methods borrowed from related and unrelated disciplines, such as political sciences, psychology, neuroscience, and behavioral economics, which can be confusing to researchers new to the field. This book provides the reader with a broad introduction to the array of qualitative and quantitative research methods required to investigate strategic management. Throughout the book, strong emphasis is placed on practical applications that transcend the mere analysis of the theoretical roots of single research methods. The underlying result is a book that encourages and aids readers to "learn by doing" – in applying the implications of each chapter to their own research. This text is vital reading for postgraduate students and researchers focused on business strategy.

Building Methodological Bridges

This volume of Research Methodology in Strategy and Management reflects a diversity of Africa-born authors in the mainland and diaspora, as well as non-Africans whose research focus on Africa, it offers high impact research that makes a major contribution in advancing management education and knowledge in Africa.

Advancing Research Methodology in the African Context

Research Methodology in Strategy and Management advances understanding of the methods used to study organizations – including managers, strategies, and how firms succeed.

Research in Times of Crisis

The 11th edition of Research Methodology in Strategy and Management focuses on understanding cutting edge methodological approaches to the study of organizations, managers, and strategy. To this end, the chapters are intended to give readers a sense of new approaches as well as retrospective accounts by Kathy Eisenhardt and Denny Gioia.

Standing on the Shoulders of Giants

The 12th edition of Research Methodology in Strategy and Management explores cutting-edge methodological approaches to the study of organizations, managers, and strategy, and provides 'how to' guides to apply these approaches.

Advancing Methodological Thought and Practice

This volume consists of two parts: "Developing Quantitative Techniques" and "Exploring Mixed Research Methods". With authors from an array of country backgrounds, including Australia, Brazil, Cana-

da, China, Russia, Singapore, the UK and the US, this volume promotes methodological exchange between the West and the East.

West Meets East

A seminal collection of research methodology themes, this two-volume work provides a set of key scholarly developments related to robustness, allowing scholars to advance their knowledge of research methods used outside of their own immediate fields. With a focus on emerging methodologies within management, key areas of importance are dissected with chapters covering statistical modelling, new measurements, digital research, biometrics and neuroscience, the philosophy of research, computer modelling approaches and new mathematical theories, among others. A genuinely pioneering contribution to the advancement of research methods in business studies, *Innovative Research Methodologies in Management* presents an analytical and engaging discussion on each topic. By introducing new research agendas it aims to pave the way for increased application of innovative techniques, allowing the exploration of future research perspectives. Volume II explores a range of research methodologies including the Spatial Delphi and Spatial Shang, Virtual Reality, the Futures Polygon and Neuroscience research.

West Meets East

This updated and revised edition offers a comprehensive overview of key research methods and the main choices available when undertaking research in business and management. New to this edition is a comprehensive, practical guide on how to write your dissertation - invaluable to all. It is a clear, concise and practical guide containing wealth of outstanding examples for each method covered. Central to this edition is the 'methods map' (chapter 4), which sets out a logical process for researchers to articulate their position in relation to five key aspects of their research philosophy. In addition, the editors have developed a free app to accompany the book and this enables novice researchers to quickly develop a comprehensive justification of their particular research design in an interactive way. Taking you through the entire life cycle of a dissertation, the text covers everything from the purposes of research through to chapters on gathering primary and secondary data; using literature; quantitative and qualitative research; managing your research; using data and research ethics. Individual chapters are allied to a powerful critical commentary showing how some of the world's leading scholars have used particular methods in their own research. Carefully constructed to achieve the greatest clarity for the student the text gives the reader: * In-text exercises * End of chapter' review questions with solutions* Exemplar papers identified and discussed for each of the main methods *Directed further reading for developing understanding in key areas It is an essential learning aid for upper level undergraduates and postgraduates across a wide range of business and management courses and it comes with a range of supported learning materials including tutorials, lecture slides and tutor notes. Kevin O'Gorman is Professor of Management and Business History and Head of Business Management in the School of Languages and Management in Heriot-Watt University, Edinburgh. He trained in Glasgow, Salamanca and Rome as a philosopher, theologian and historian. His research interests have a dual focus: Origins, history and cultural practices of hospitality, and philosophical, ethical and cultural underpinnings of contemporary management practices. Using a wide range of methodological approaches he has published over 80 journal articles, books, chapters, and conference papers in business and management studies. Robert MacIntosh is Professor of Strategy and Head of the School of Management and Languages at Heriot-Watt University. He trained as an engineer and has worked at the Universities of Glasgow and Strathclyde. His research on the ways in which top teams develop strategy and on organizational change has been published in a wide range of outlets. He has a long-standing interest in research methods for business and management studies and has published on the relevance of management research using methods that include ethnography and action research. He has consulted extensively with public and private sector organizations and sits on the board of the charity Turning Point Scotland.

'[T]here is, as with all the chapters, an excellent set of suggested further reading...' - Management Learning `Postgraduate students should find this a useful book, since it focuses on issues specific to their requirements. The philosophical underpinnings, methodology and practicalities of research are all discussed within the context of postgraduate research' - International Small Business Journal This wide-ranging text comprehensively overviews management research and research methodology. The

authors take the reader through all the major stages of the research process and introduce the key methods. After highlighting the different contexts and purposes, strategies and tactics, programmes and processes of management research, the authors provide detailed coverage of the relevant research approaches and methods. They discuss the interrelationship of theoretical and empirical research, and how these apply to practice. The implications of using quantitative and qualitative methods are examined, and practical advice is given on the available analysis techniques and software packages.

Doing Research in Business and Management

This essential text provides an authoritative overview of research methodology for both students and professional researchers in management. Based on course needs and written by expert academics in the field, this core text addresses the practical concerns of students in undertaking research that is relevant to management practice. It places emphasis on the more practical concerns of management researchers, focusing on the detail of developing and applying particular sets of research skills. In addition, the book gives straightforward advice on how to: ·develop a systematic methodology · learn to be a successful writer · acknowledge the individual in the researcher The text develops tangible skills and will be an invaluable guide for management researchers and students at postgraduate and MBA levels.

West Meets East

The premise of this volume is that the complex social processes that animate strategic decisions involve not only top-level executives, but also middle managers distributed throughout the organization. Designed for doctoral students and others interested in middle managers and strategy process, the Handbook integrates the threads of scholarly work in this domain and charts a course for future research. Chapters are written both by scholars who have 'paved the way' for the middle management perspective and scholars who have done recent, cutting edge research from this point of view.

Essential Skills for Management Research

Social Entrepreneurship and Research Methods focuses on research gaps in the growing field of social entrepreneurship and highlights a number of methodological approaches involving novel data sources and quantitative and qualitative techniques to build knowledge concerning the determinants of social enterprise success.

SAGE Course Companions are an exciting new series from SAGE offering students an insider's guide into how to make the most of their undergraduate courses and extend their understanding of key concepts covered in their course. Social Research Methods provides student readers with essential help with their research project, with revising for their course exams, preparing and writing course assessment materials, and enhancing and progressing their knowledge and thinking skills in line with course requirements on Research Methods courses. This Course Companion is designed to augment, rather than replace, existing textbooks for the course, and will provide: " Helpful summaries of the course curriculum to aid essay and project planning " Key summaries of the approach taken by the main Methods textbooks " Guidance on the essential study skills required " Help with developing critical thinking " Route-maps to aid the development of wider learning above and beyond the textbook " Pointers to success in course exams and written assessment exercises " A tutor's-eye view of what course examiners are looking for " An insider's view of what key course concepts are really all about SAGE Course Companions are much more than revision guides for undergraduate; they are an essential tool to taking your course learning and understanding to new levels and in new directions that are the key to success in undergraduate courses.

Social Entrepreneurship and Research Methods

Offering innovative ideas that explore how strategy and management methodology can be developed, *Methods to Improve Our Field* considers approaches that range from the re-imagining of secondary data in the digital age and Interpretive Phenomenological Analysis (IPA) to Machine Learning and Artificial Intelligence.

Social Research Methods

Research in strategy has shifted significantly towards strategy as something organizations have, rather than strategy as something that managers do. The activities of the people who actually manage and develop organizational strategy have become marginalized. *Strategy as Practice* argues the reverse: that research on strategy needs to take seriously what strategists do and the effects of what they do. Written by a distinguished team of researchers and educators, this book sets out a research agenda, provides guidelines on theoretical perspectives and alternative methodologies for research on practice as well as commentaries on published illustrative papers that exemplify the practice perspective. *Strategy as Practice* will be essential reading for doctoral students, researchers and academics who wish to understand or undertake research in this important field of management research.

Essay from the year 2007 in the subject Business economics - Business Management, Corporate Governance, grade: 69% - B, University of Sunderland (Faculty of Business and Law), course: Applied Research Methods for Business and Management, language: English, abstract: The notion of job satisfaction is one of the most extensively researched topic areas in organisational management as it associates with individual and organisational outcomes. The paper illustrates, apart from the general strategic and operational literature, a section on the impact of culture on employee motivation. The researcher will use an inductive approach with a qualitative research design. In order to measure the above mentioned variables in such a unique and complex workplace, the researcher will develop suitable interview questions and conduct interviews with employees working in the cruise market industry.

Applied Research Methods for Business and Management - Job Satisfaction

Design Methods and Practices for Research of Project Management is the most comprehensive guide on how to do research of and in project management. Project management as a discipline has experienced near-exponential growth in its application across the business and not-for-profit sectors. This second edition of the authoritative reference book offers a substantial update on the first edition with over 60% new content and so provides both practitioner and student researchers with a fully up-to-date and complete guide to research practice on project management. In *Design Methods and Practices for Research of Project Management*, Beverly Pasion and Rodney Turner have brought together 27 original chapters from many of the leading international thinkers in project management research. The collection looks at each step in the research stages, including research strategy, management, methodology (quantitative and qualitative), techniques as well as how to share and publish research findings. The chapters offer an international perspective with examples from a wide range of project management applications; engineering, construction, mega-projects, high-risk environments and social transformation. Each chapter includes tips and exercises for the research student, as well as a complete set of further references. The book is the go-to text for practitioners undertaking research in companies, and also doctoral and masters students and their supervisors who are involved in research projects in and for universities.

ECRM2015-Proceedings of the 14th European Conference on Research Methods 2015

This book deals with methodological issues in the field of management and industrial engineering. It aims to answer the following questions that researchers face every time they look to develop their research: How can we design a research project? What kind of paradigm should we follow? Should we develop a qualitative / phenomenological research or a quantitative / positivistic one? What techniques for data collections can we use? Should we use the entire population or a sample? What kind of

sampling techniques can we have? This book provides discussion and the exchange of information on principles, strategies, models, techniques, applications and methodological options possible to develop in research in management and industrial engineering. It communicates the latest developments and thinking on the research methodologies subject in the different areas, worldwide. It seeks cultural and geographic diversity in studies highlighting research methodologies that can be used in these different study areas. This book has a special interest in research on important issues that transcend the boundaries of single academic subjects. It presents contributions that challenge the paradigms and assumptions of individual disciplines or functions, with chapters grounded in conceptual and / or empirical literature. The main aim of this book is to provide a channel of communication to disseminate knowledge between academics and researchers, with a special focus on the management and industrial engineering fields. This book can serve as a useful reference for academics, researchers, managers, engineers, and other professionals in related matters with research methodologies. Contributors have identified the theoretical and practical implications of their methodological options to the development and improvement of their different study and research areas.

Design Methods and Practices for Research of Project Management

The contributors to this book explore the role and importance of qualitative, interpretist research in the dynamic field of enterprise. They establish the link between the innovative nature of small enterprise and the need to utilise research methodologies, which are themselves innovative. The book highlights the fact that enterprise research has the advantage of sufficient youth as a research discipline to permit a wide scope for new and innovative research studies. Probing this unexplored terrain therefore requires exploratory research methods supported by inductive research techniques. These methods and techniques are examined in detail: topics covered are diverse, ranging from a review of quantitative research methodologies and the integration of methodological philosophies and approaches; to the application of two novel analytical techniques. Convergent interviewing, action research, case research and marketing research for isolated SMEs are all also explored in depth. This book will provide academics, researchers and students with a cohesive body of material on the use of interpretist research techniques in all areas of enterprise research.

Research Methodology in Management and Industrial Engineering

Management research has expanded considerably over recent decades. The impetus for such growth comes from a wide range of forces both inside and outside of the academic community stimulate and regulate its development, while the audience for which management research might be considered to be useful and the extent of that usefulness are highly contested. This book seeks to explore the forces that drive the development of management research, shape its current state and influence its future potential.

Innovative Methodologies in Enterprise Research

Most researchers in organization and management studies stick to two or three traditional research methods like surveys and interviews. Sticking with the familiar is seen as a safe bet, and innovation is discouraged by academic incentives and rewards. But research participants are now suffering from 'survey fatigue', and using the same old methods runs the risk of generating the same old findings. This book describes twelve unconventional methodologies in organization and management research. These include unconventional research settings and data sources, unconventional research designs and data collection methods, unconventional analytic approaches, and designs and methods that exploit new technology developments. The aim is to encourage dialogue and experimentation with regard to the development of innovative, unconventional approaches to organization and management research. Several commentators have criticized the way in which research methods have become more formulaic, and have argued for greater diversity in research approaches. The methodological perspective that we adopt shapes our interpretation of the information that we gather. Different methods generate different kinds of information, leading to different ways of understanding the phenomena that we are investigating. Our methods influence our styles of theorizing, ways of thinking and reasoning, and forms of writing and reporting research. This book will be of value to academic researchers in organization and management studies, Doctoral candidates, and Masters students on MBA and similar programmes.

Challenges and Controversies in Management Research

This new edition helps management students with the methods they need when undertaking their project work, be it at first degree, diploma, MBA or doctorate level. The text incorporates feedback from a range of researchers, educators and students, with new examples of management research included.

Case Study Methodology in Business Research

Research in public administration and public management has distinctive features that influence the choices and application of research methods. Periods of change and upheaval in the public sector provide ample opportunities and cases for research, but the standard methodologies for researching in the social sciences can be difficult to follow in the complex world of the public sector. In a dynamic political environment, the focus lies on solving social problems whilst also using methodological principles needed for doing scientifically sound research. Research Methods in Public Administration and Public Management represents a comprehensive guide to doing and using research in public management and administration. It is impressively succinct but covering a wide variety of research strategies including among others: action research, hypotheses, sampling, case selection, questionnaires, interviewing, desk research, prescription and research ethics. This textbook does not bog the nascent researcher down in the theory but does provide numerous international examples and practical exercises to illuminate the research journey. Sandra Van Thiel guides us through the theory, operationalization and research design process before explaining the tools required to carry-out impactful research. This concise textbook will be core reading for those studying research methods and/or carrying out research on public management and administration.

Research Design for Business & Management

The Handbook of Research on Competitive Strategy presents a comprehensive state-of-the-art picture of current strategic management issues and demarcates the major investigation strands that are likely to shape the field into the future. The Handbook is the outcome of a far-reaching endeavour including new contributions from highly-reputed experts around the world, outlining the conceptual and empirical advancements and assessing the promises and practical relevance of the competitive strategy field. Looking at key areas such as alliances and innovation, ownership and networks, coopetition and entrepreneurship, multinational and trust management, and firm's financial structures and business models, the book sets a research agenda for the future of competitive strategy research. Gathering various solid branches of investigation that revolve around specific theories and applications (such as the socio-cognitive perspective, the strategy-as-practice view, and the most recent developments in competitive dynamics and the resource-based perspective of the firm), this inspiring and thought-provoking Handbook will provide executives, entrepreneurs, students and scholars in management with many insights into the nature and process of competitive strategy emergence, configuration and development.

Research Methodology and Strategic Management

Providing a detailed discussion of the practice of doing critical research in organizations, utilizing both qualitative research processes and critical theories of organizations, this textbook will be essential for all those involved in interpreting and researching contemporary institutions and organizations. This volume gives an authoritative and insightful framework for navigating critical theories and methods across the social sciences, but in particular in relation to the study of corporate organizations.
