## From Plan to Market

This packet of lessons focuses on the transition from a legacy of central planning to a market orientation in the economic systems of Central and Eastern Europe, the newly independent states of the former Soviet Union, and China. These lessons seek to provide high school teachers with a well-informed approach to teaching about this transition. The lessons emphasize the complex texture of events and the regional distinctions found among the transition economies. The materials also highlight findings about certain conditions that seem crucial to economic reform and introduce economic concepts that teachers and students can use to describe and explain the successes and the failures of economic change. The ten lessons include: (1) "The Legacy of Soviet Communism"; (2) "Different Paths to Reform: Case Studies of Poland, China, and Russia"; (3) "Political and Economic Freedoms"; (4) "How To Privatize?"; (5) "Monopoly Is Not Just a Game"; (6) "Why Trade?"; (7) "Why Middlemen Matter: The Role of Financial Institutions in a Market Economy"; (8) "Resisting the Siren Song of Inflation"; (9)

"Brother, Can You Spare a Ruble?"; and (10) "Distribution of Income: Different Ways to Slice the Pie." The appendix contains selected world development indicators for the regions under study. (EH)

## Basic Economic Principles

The purpose of Pedagogy of Humanization: Preparing Teachers for Culturally Sustaining Classrooms is to build a critical mass of educators who know how to employ the principles of critical pedagogy in elementary classrooms. This includes attention to the various knowledge, skills, and dispositions required of critical pedagogues in their curricula, instruction, assessment, classroom environment, and relationships. From Critical Race Theory (CRT) to restorative justice-oriented classroom management, the theoretical is made practical. Moreover, the structure of the book follows the curriculum of a traditional teacher education program, making it complementary to any teacher education course. The Pedagogy of Humanization is the first book to bring together the practice (how) and theory (what and why) of inclusive and asset-based teaching. In this book, a group of teacher-educators across disciplines explore their personal and professional identities to reveal the potential for applying each tenet of culturally relevant pedagogy in their respective fields. Filled with anecdotes, exercises, user-friendly theories and examples, readers will learn how teachers can humanize themselves to have the capacity to be effective teachers of children who have been dehumanized and underserved by traditional teaching and schooling. Pre-service teachers will read this book so that they can connect the material they study in teacher education courses to the daily work of being an educator who aims to be justice-oriented. However, this is not a “foolproof” guide or “how-to” manual that could be completed without direct support from mentors and colleagues. Instead, readers will practice the sort of engagement in individual and community growth that ignites the possibility of teaching as a force for social change. In many ways, chapters of the text could be used through a flipped classroom approach whereby faculty invert the typical cycle of content acquisition and application. The book will prove to be a valuable resource as a teaching text in classrooms devoted to critical pedagogy, Critical Race Theory, social justice, and other topics necessary to produce teachers who are prepared to maximize their effectiveness in educating today's students.
