Designing the Ideal Distribution / Fulfillment Network Success in the omnichannel retail market requires leading practices and integration of multiple layers of organizational capabilities. The achievement of a client's distribution/ fulfillment network objectives requires the effective Integration of people.

Process Results in Developing More Valuable Network Options The Tompkins Approach

Strategic Planning Objective: Decide on the company objectives

Example Template for Defining Portfolio of Initiatives and Their Prioritization

Tactical Planning Objective: Plan policies and programs, and set targets to accomplish the company's strategic objectives

Defining the Project Scope

Identify the Demand and Service Curves Each service model should be evaluated based on the anticipated level of service to meet customer demands and cost to serve

Network Analysis Tool

Understanding Data Requirements There are six (6) primary modeling tables, plus other general information

Understanding External Influences Network Requirements

Modeling Status Quo
